Motel One Manchester, St. Peter Square – usage of preparation area

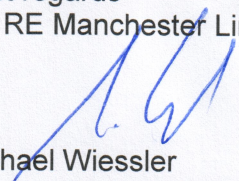

Dir Sir or Madam,

we herewith confirm that the preparation area is not used as a fully functional kitchen but only used for the preparation of the breakfast.

The food of the breakfast is delivered packed and ready-to-use so no cooking is required and no appliances will emit excessive heat or vapour.

Breads are delivered as frozen dough and will be baked in a combination oven of the brand "MIWE". The Miwe Cube combination oven will emit steam when the doors are open. However sited above is a Miwe fully automatic condensate hood (model hood sc and air 10.0406) specifically designed by Miwe to compensate for this discharge.

Best regards
M1 RE Manchester Limited
