5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

We are replacing the old, communal gas heating systems with individual Air Source Heat Pumps. This will mean that, at each property, an individual air source heat pump will be placed on the external elevation. The residents will have individual control of the ASHP's (something they do not have at present with the existing system) which will mean a better temperature internally and also a vast reduction in CO2 emissions that will tie in with the aspects of the 'Climate Emergency' that has recently been called by Manchester City Council.

The individual control of heating systems will provide individual residents with ownership of their heating systems meaning that they will become aware of the amount of heat they are using. The current systems of communal boilers with no thermostatic control leads to several issues. It goes against the logic with the Heat Metering and Billing Regulations 2017 which places an onus on landlords to provide individual controls to each resident - the new system will have TRV's and thermostat included as part of the highly efficient ASHP installation. Currently MCC pay the gas bill for the whole property and recoup monies (via a service charge) from each resident. The residents generally control heat in a highly inefficient way - by opening windows and closing them as they have no overall control of the system. This means that the residents exceed general use and not all gas consumption costs are regained from the residents. As well as

5. Description of the Proposal

this the CO2 emissions from this way of controlling the heating are large. The replacement heating system is highly efficient and will vastly reduce the CO2 emissions. As an electric system, this is being produced more and more from renewable energy sources and this will continue to increase moving forward. ASHPS to serve all 3 flats - Flat 1, Flat 2 and Flat 3 at 35 Burford Road

Has the work or change of use already started? ☐ Yes ☒ No

6. Existing Use

Please describe the current use of the site
