**The FSC is the only timber-certification scheme which has endorsement from the major environmental charities, including Friends of the Earth, WWF, Greenpeace and The Woodland Trust. It does not include our deluxe enclosures or log stores. These enclosures are supplied in flat panels with a screw kit for you to screw together. It's much much easier if you use an electric screw driver. Please make up your own mind whether to fix the wheelie bin enclosures down. Although not normally necessary, it may be advisable in very windy locations. If you are planning to stain the enclosure please assemble the enclosure first, we recommend to wait for 8 weeks or longer then stain. The reason being is that the timber has just been pressure treated and it's always best to allow it to oxidise a little before staining.

* Delivery is included to mainland England and Wales. Sorry but there will be a surcharge to other UK destinations.
