

Proposed Extension to Industrial Unit

Claytonbrook Road Planning Ref 131081/FO/2021

Site use and servicing

The proposed development is to extend an existing commercial building which is used for storage and distribution of ambient food products used by restaurants in the Manchester area.

Products are brought to the site with one delivery in the morning typically using a 7.5tonne vehicle this is unloaded and goods stored.

Deliveries are loaded to a transit van sized vehicle and delivered to local restaurants during the day. The site is used from 0900hrs to 1700hrs Monday to Friday.
