SPECIFICATION FOR GREENING OF EXISTING 3M HIGH TIMBER FENCE

TRELLIS ELEMENTS

- 3mm 7x7 strand galvanised steel wire rope
- 3mm BZP wire rope clamp/grips
- 55mm BZP screw in vine eyes with a lag thread
- M6 hook/eye BZP turnbuckle tensioners
- Flexible soft ties – 3.5mm thick

WIRE POSITIONING

1. First wire to be positioned horizontally 200mm above ground level
2. Subsequent wires to be positioned horizontally at intervals of 400mm from first row
3. Total number of horizontal wires to be 7no.
4. Vine eyes to be fixed to each timber fence upright in a neat vertical row. Wire to be threaded through each vine eye
5. Turnbuckle tensioners to be fitted to every run of wire of a run of no more than 10m in length

PLANTING

6. All planting to comply with the planting notes on The Plant Room Drawing PR/17/AH01/GA/01 REV F
7. All areas to the base of the fence line to be free of grass and weeds prior to planting of the proposed climbers
8. Proposed planting to be into prepared pits 300 x 300 x 300mm
9. Climbers to be planted every 450mm
10. Prior to planting, plants to have any attached stakes or trainers carefully removed, so as not to damage any stems or leaves prior to planting
11. Upon planting, any long stems of the climbing plants to be encouraged onto the first horizontal guy wire and attached as necessary with flexible soft ties

CLIMBER PLANTING SPECIFICATION

44no. Clematis vitalba	60–90cm	1.5L
44no. Clematis montana	60–90cm	1.5L
44no. Hedera hibernica	60–90cm	1.5L
44no. Lonicera periclymenum	60–90cm	1.5L
44no. Parthenocissus quinquefolia	60–90cm	1.5L
