Hello Tom,

Of course. No problem. I spoke with the consultant a moment ago and she has passed across the WSI approval email below. I have included the thread but if for some reason the below chain is obscured or doesn't download properly then please let me know.

Best wishes,
Rupert

Hi Michelle,

Thanks for sending this across. No problem with the trench plan, as you say they're a little shorter but targeting the same areas/potential structure. Happy to approve the trench plan in that configuration.

The only comment I have is regarding photography (para 4.5.9). If the job is being staffed from an office with access to a DSLR digital camera then that's great, particularly if there are good remains and the project goes to a phase of open area, but in general, so long as high res, colour, digital images are being captured and correctly stored I've got no problem if the camera isn't specifically a DSLR.

Kind regards,

Ben

Hi Ben

I know you've been chatting with Rupert about the WSI for, Slate Wharf, Blantyre Street, Manchester (113617/FO/2016).

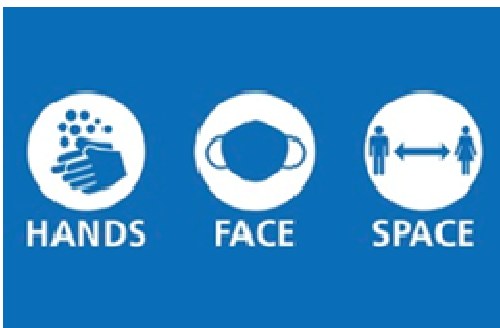

I know from the email correspondence that a trench plan was produced and approved by Norman bac in 2016. We've had to make some adjustments to the trench sizes due to site restrictions, but they are still targeting the same features/blank areas as before. I've attached the draft WSI for your consideration and also a separate Figure showing the new trench sizes overlaid on the 2016 trenches.

Let me know if there are any issues in downloading or if you have any questions!

Have a good weekend
Michelle
