Site Address: New Moston Primary School, Moston Lane East, Moston, Manchester, M40 3QJ

Dear Andrew

INITIAL PRICING QUOTATION

With reference to our recent site visit, please find below our findings and subsequent initial pricing quote:

FRONT AUTOMATIC SLIDING GATE WITH PERIMETER ENCLOSURE FENCING, VIDEO INTERCOM SYSTEM AND ACCESS CONTROL:

- To supply and fit an automatic sliding gate in a matching design and finish as the existing perimeter fencing with all required safety devices and enclosures to eliminate any trap, dragging and crushing areas.
- The gate will be operated via a video intercom system which will connect to a handset within the reception building.
- Vehicles will be able to drive up to the gate and it automatically open during set hours.
- Vehicles exiting the site outside of normal hours will need to operate the gate by entering a code into an external keypad.

FRONT AUTOMATIC PEDESTRIAN GATE WITH VIDEO INTERCOM SYSTEM AND ACCESS CONTROL:

- To supply and fit an automatic pedestrian gate in a matching design and finish as the existing perimeter fencing with all required safety devices and enclosures to eliminate any trap, dragging and crushing areas.
- The gate will be operated via a video intercom system which will connect to a handset within the reception building.
- Pedestrians exiting the gate will do so by pressing a push button located on the rear of the gate post.

HERAS TANGO RAILING TR800 PROTECTIVE FENCING:

- To supply and fit Heras railings at 1200mm high, approximately 120 meters in total with all support posts required - as per the drawing provided.

BIN STORES MANUAL DOUBLE SWING GATES:

- To supply and fit a set of manual swing gates for access to the bin stores.
- The manual gates will be secured using a central locking mechanism along with drop bars to hold the gates in the open position when required.
- The design and finish of the gates has not been specified so we have therefore quoted for the same design and finish as the new sliding and pedestrian gate.

RECEPTION AUTOMATED SLIDING GATE AND INTERCOM SYSTEM:

- To supply and fit an automatic sliding gate in a matching design and finish as the existing perimeter fencing with all required safety devices eliminate any trap, dragging and crushing areas.
- The gate will be operated via a video intercom system which will connect to a handset within the reception building.
- Pedestrians will exit the gate by using a push to exit button.
