

Notes:  
Proposals are based on building surveys in their current condition. It is expected that during strip out works further historic elements that may be desirable to be retained will be found. On this basis a watching brief will be undertaken by a suitably qualified person during strip out works. As elements are found these will be reported and assessed and if necessary proposals will be updated to incorporate.

Windows  
All windows to be restored to original condition.  
All railings to be restored to original condition.  
Where original windows and/or railings have been replaced over time they are to be replaced with to match original exactly including materials and design.  
See Window Schedule for details. To be produced.

Radiators  
Generally radiators are new and have no historic value.  
A number of radiators do have some historic significance and are to be refurbished and retained in none working order and repositioned in various locations as features.  
All radiators remain below window sill level.  
See Radiator Schedule for details. To be produced.

Removal Works  
All removal works are to proceed carefully to protect the integrity of the building in general.  
Extra care to be taken when removals are near known historical elements, columns, lift shafts, solid structure and external walls.  
Any previously hidden historical elements subsequently exposed are to be reported to the Architect for record and consideration of retention.  
Removal works to be checked on a daily basis to ensure no unnecessary loss of historic fabric.
