OPENSHAW COLLEGE – SPORTS HALL – FUME/ODOUR EXTRACTION

We are consulting engineers dealing with the above project. I write to confirm that the scheme does not contain, or use equipment that will generate any fumes, odours or vapours, which could cause harm or nuisance to occupants or people within the vicinity of the buildings.

The joinery workshop is fitted with a dust extraction system that captures air borne dust particles through filtration and collects the dust for removal. Air is returned to the workshop through a recirculation system. The system is manufactured by specialist FILTERMIST Ltd to current and relevant standards.

If you require any further information then please do not hesitate to contact the undersigned.

Yours Faithfully
