Easydriveways

Your Driveway is more than a hard surface!

We understand that having work done on a driveway, patio, pathway or any other paved area is a big decision. This is why we install this modern paving system with true traditional values.

What to look for in a new driveway:

Its never easy to choose a contractor so here are some tips...

Cost – create a budget, and get the price in writing

- Quality - check out some work, and the customers satisfaction rates
- Guarantees – from who and how long?
- What commitment are you getting? Some contractors start a job and go and do 3 more in between!
- What does the paving do for you, besides just look good? Some have major maintenance issues every few months, never mind years

Don't worry if you don't choose to use Easydriveways, we are always happy to help you in any way we can.

What we offer:

Easydriveways have set high standards not just for our employee's but in the industry, leading the way with future ground breaking paving, as well as traditional paving

- We agree the work that needs to be done and give you a quote. As long as this is the only work you need you will only pay what you are quoted
- We have a long list of satisfied customers and reviews across the internet
- We offer Bretts (the block manufacturers) 5 year installation and 10 year block guarantee.
- We never start a contract without a complete focus on your drive
-

Our paving is different in so many way,

90 % less weeds,

Could cut your water bill by 28%

Wont allow any water to run from each block so no travelling water

Never see a puddle ever again

No pools of ice and lets snow melt instantly with running and turning to ice ponds
can also be water harvesting relieving the demands on your water mains and meter,

is built in a totally different manner from traditional paving

so inclement weather doesn't interfere with our program of works

easydriveways

From the most complex of requirements to the simplest of tasks .
we at easydriveways work with the upmost pride and effort in our
work

Form all styles of patio and paving, we offer a wide range of
paving been manufactured within the UK and across the
world. all carrying manufactures guarantees' not just our own.

Natural colours and styles

easydriveways

Never see any rainwater run towards your house or off your driveway again, each and every block paver is build with a special tab, the tabs allow water to filter straight into the ground where the water falls, not allowing any build up of water again, no walking through dirty wet puddles every again,

The permeable paving system was devised by professor John Knapton,
He studied his system at Newcastle university for 7 years,
creating a system that no only can cope with future weather conditions in our climate,
but is capable of using all the elements to our advantages'

we have a complete design service to calculate how deep and what materials we need ,theirs
no guess work when it comes to the design of your new driveway it professionally calculated
to the millimetre.

These driveways are the same age !

What our customers say about us

For our latest reviews please follow the link

<http://goodtraderscheme.com/profile/easydriveways/612/>

I have no hesitation in highly recommending Paul and his company, from my first phone call to the completion of the job. Everything went so smoothly. I felt confident that I could trust him in every way to do a good job. I wasn't disappointed, I found him genuine, courteous and reliable. We are so happy and pleased with our fantastic new driveway

This team are exceptional. They gave us a competitive quote for the driveway. They arrived when they said they would and worked extremely hard through all weathers to a high standard. They went above and beyond - they saw my husband struggling with a totally different job at the back of the house and went and finished it! They came back a week later to do footings for us for another build project and we are booking them for further paving work.. Both our next door neighbours were so impressed they are booking them too! Genuine, kind, hardworking people - we were lucky to find them :-)

I used the Wigan Good Trader website to find a driveway contractor to dig up and replace our tired looking 29 year old tarmac drive. Easydriveways and another company with good feedback were found to provide quotes. A date and time were agreed with Paul from Easydriveways to attend and provide a quote. The other company did not respond after my initial contact. Paul and I discussed the project and he made some useful suggestions that would enhance the look of the finished project. Having discussed with neighbours how much they had paid for similar work, I was pleasantly surprised by how competitive Paul's price was. A date was agreed to start the work. Paul and his team arrived on the appointed date and commenced work. The "spoil" was immediately removed from the site and at the end of each day, the site was left tidy. Being a week or so before Christmas, the weather was cold, wet and miserable but this did not seem to lead to delays or early finishes before daylight faded. Laying the new drive finished on time and the following day one of the team returned to remove surplus blocks, stone and equipment. Hopefully Paul and the team managed to thaw out before Christmas and enjoyed a good few days off in the warmth of their homes. We are very pleased with the result and have no hesitation in recommending Paul and Easydriveways.

Where Permeable paving comes from

Professor John Knapton

We got involved with permeable paving having installed pattern imprinted concrete for years,

We could see the difficulties in our climate. In this country we pave over more and more area's every day. This adds to the issues the country is facing with flooding. Because of this we looked for a better system, Now many years later can say its far superior in every way to any other paving system on the market.

This system is a truly permeable paving system unlike resinbonded systems that need a fully bonded sub-base. permeable paving deals with any amount of rainfall.

Professor John explains how he got involved with this system: "interpave was aware of the research we were doing at Newcastle University into permeable paving systems and came to see me in 2000 to ask my advice on developing a permeable paving product for them.

"Professor Knapton also works as a consultant for world-renowned insurers, Lloyds Underwriters and it was in this capacity that he became involved in the World Trade centre investigation.

He explains:

"Lloyds were the main insurers for the Twin Towers and I had to find out if the way the towers were built and designed, contributed in anyway to their collapse after they were hit by the planes. I concluded that the way they were designed and built actually prevented them from falling over and thus would have saved around 100,000 lives which would have been directly in their paths had they fallen over. I was attached to the main investigation committee and its conclusions followed mine. The main implication of it all was that no one felt we had to stop erecting tall buildings. The only recommendation we made for the future of tall buildings was that instead of placing the lifts in one place, they should be positioned in all four corners of the buildings to give people a better chance of getting out in an emergency."

About Professor John Knapton

John Knapton is a consulting civil and structural engineer having spent his career half in consulting and half in academia. In 2002, he retired from the Chair of Structural Engineering at Newcastle University to focus entirely upon consulting, whilst maintaining a Visiting Chair at Liverpool University. He graduated with a First Class Honours Degree in Civil Engineering from Newcastle University in 1970 and with a PhD in 1973. His early research work was into concrete block paving and concrete roads at The Cement and Concrete Association then following a brief period in industry, he took a lectureship at Newcastle where he researched heavy duty paving, concrete block paving and highway design. He prepared the world's first design guides for heavy duty industrial pavements and for concrete block roads and advised product groups worldwide in the development of the technology of pavers.

During the 1980s, he established his consulting practice with offices in London and Newcastle before returning to Newcastle to take up the Structural Engineering Chair in 1991. During the 1990s, he developed design methods for permeable paving following his research using his full scale pavement test facility. This research has informed design information currently being disseminated by Interpave and by others.

He has written three books on ground bearing concrete and had developed the four editions of the British Ports Association heavy duty pavement design manual. He has advised BS committees in the development of paver standards.

He assisted one of the re-insurers of the Twin Towers following their attack in 2001 and was appointed to the Cabinet Office Committee responsible for developing structural engineering related procedures as part of the Government's anti-terrorist London Resilience initiative.

Much of his recent design work has been in the area of Sustainable Drainage (SuDS) and he has been involved in the design of over 60 SuDS projects involving Permeable Pavers in Ireland and in the UK.

His other interests include his work as Chief of a Ghanaian village where he and his students have installed a borehole and he continues to fund the John Knapton Library in his village of Ekumfi-Atakwa. In 2000, he drove a double deck bus from Newcastle to Ghana where it takes children from local schools to his library. He is also an after dinner speaker and occasional documentary presenter for BBC TV.

Our success is based on working closely with an established national network of quality builders merchants, approved installers and professionals to provide an extensive range of sustainable hard landscaping solutions. This range includes a wide selection of [block paving](#), [permeable paving](#) - for use in Sustainable Drainage Systems (SuDS), [specialist kerb systems](#) as well as a [wide variety of natural stone paving options](#).

In addition, our **Brett Approved Installer** scheme provides you with total confidence in your paving contractor, whether you are seeking a new driveway paving installation, patio paving installation - or both - your driveway will be completed to the highest standard and give you many years of enjoyment.

10 Year Product Guarantee

In This Guarantee:

The Company*	Heatec Boat Lasingham Ltd, of Sleaford Road, Sleaford, Leics. (England) (Telephone 01533 612104)
The Customer*	name _____
The Product*	name of the Company's concrete products supplied in relation to the Approved Installer Contract _____
Guarantee Start Date*	name _____ (see page 2 below)

Approved Installer Contract* means the Contract for the supply of the products manufactured by the Company and used in the works undertaken pursuant to the Approved Installer Contract and the related goods and services as replacement (at the discretion of the Company) for a period of 10 years from and including the Guarantee Start Date (subject always to the following conditions)

The Company guarantees that, any material defect in the Products manufactured by the Company and used in the works undertaken pursuant to the Approved Installer Contract shall be made good by either repair or replacement (at the discretion of the Company) for a period of 10 years from and including the Guarantee Start Date (subject always to the following conditions)

1. This guarantee only applies to the Concrete Products which have been installed pursuant to the Approved Installer Contract
2. The Company shall have no liability under this Guarantee and the Approved Installer Contract for any off-work and off-site payment or the cost paid for the Products not being installed
3. The Company shall be under no liability in relation to:
 - (i) any defect or use of the Products not in accordance with the scope of use intended by the manufacturer/producer
 - (ii) the direct or indirect use of the concrete products for purposes other than those specified in the Approved Installer Contract, including the alteration of the shape or the use of the Products in the building of other structures
 - (iii) failure of the Customer to use the Products in accordance with the Company's instructions issued from time to time pursuant to the Approved Installer Contract
 - (iv) any use which is not reasonably predicted by the use of the products as installed
 - (v) Products not supplied in accordance with the Approved Installer Contract
4. No guarantee claim is recoverable in respect of damage caused by fire, flood, theft, sabotage, war, terrorism, sabotage, lightning, explosion, or other natural or man-made causes, or other liability arising from the use of the Products in connection with the Approved Installer Contract
5. The Company shall have no liability for replacement, repair or completion in other natural circumstances of product or in other circumstances due to damage, or negligence, which cannot be attributed to any visible cause outside the Company's control
6. The Company shall not be liable under the terms of this Guarantee in respect of any Products installed or used in connection with the Company and its authorised installer, being structural elements such as the hull or the keel of a boat
7. The Company shall have no liability for any negligent act or omission to do so on the part of the Approved Installer
8. The Company shall have no liability for any negligent act or omission to do so on the part of the Customer

By making a claim pursuant to this Guarantee, the Customer agrees to accept the performance of the Products. The Company's liability under this Guarantee shall be limited to repair or replacement of the material or structural components of the Approved Installer Contract, which contain a defective product to which the terms of this Guarantee apply. Where the Company considers it to be necessary, the Company will only be responsible cost of repair and replacement of defective Products which are not responsible for the cost of a claim. No liability for any other consequential loss or damage (including financial loss) arising as a result in death or personal injury or damage to property or any consequential loss or damage resulting from the Company's liability under this Guarantee shall be recoverable by the Customer.

Notwithstanding the above, the Company shall have no liability in a claim, action and/or suit for any negligent act or omission on the part of the Customer which is not a claim, action and/or suit for any negligent act or omission on the part of the Customer. The Company does not guarantee that any repair or replacement will be for a longer period in duration than the effects of natural wear/tear, deterioration or materials or construction of product.

The Company shall have no liability under this Guarantee unless the Customer shall have agreed to the Company within seven days of the start-up of the work of the Approved Installer Contract a copy of the Guarantee. No liability shall be recoverable by the Customer if the Approved Installer Contract shall have been signed by the Customer.

All arbitration clauses or other dispute resolution by the Company and its authorised installer shall be subject to the arbitration of the arbitration institution (as determined by the arbitration institution) and shall be subject to the arbitration of the arbitration institution. The arbitration institution shall be subject to the arbitration of the arbitration institution. The arbitration institution shall be subject to the arbitration of the arbitration institution.

4. If you wish to make a claim, it is required when making a claim (either prior or after your Guarantee Registration Form and return it to Heatec Boat Lasingham Limited in order to enable you to file a claim under this Guarantee.

Calvin Jackson, Approved Installer Scheme Manager

The chart below tries to explain the difference where your investment goes when considering different paving systems .you can see that the most investment you place is best represented by permeable paving, the reason being is that the labour costs are significantly lower ,the reason for this is there is no reason that inclement weather will stop the installation ,so we have much less down time, So your paying for the more expensive material but less downtime in labour, so when we have finished you have much more invested in the driveway than in the pocket of the company installing it. Down time is usually caused by rain entering the sand systems and turning it into mud sort of caricature, also leaving voids when it dries out, that when driven on let the paving sink.

WHY I WILL BUILD BETTER FOR YOU AS A MASTER BUILDER

The Master Builder badge is recognised as the sign of building quality. To gain Master Builder status my company has been professionally vetted. I had to demonstrate a minimum of 12 months trading, have public and employers' liability insurance, and pass credit and director checks.

As a Master Builder:

- ✓ I have agreed to abide by FMB's Code of Practice.
- ✓ I can offer you a contract on the building project so we both know where we stand.
- ✓ I can offer you a warranty on any work I carry out through FMB Insurance Services – their policies are underwritten by Lloyds of London so you can be assured you're getting the cover you need.
- ✓ I have agreed to cooperate with the FMB Dispute Service, so should anything go wrong they can provide Alternative Dispute Resolution.
- ✓ I have Public and Employers liability insurance and passed credit and director checks on joining.

You can check my membership at www.fmb.org.uk/checkamember

◀ Look for the sign you can trust and make your building experience better.

BUILD BETTER

www.fmb.org.uk

How to choose the right builder.

Dear homeowner,

Choosing who builds or improves your home is an important decision. I hope this letter will give you assurance, and assist you to choose the right builder.

Unlike most people in my trade, I have achieved the status of **Master Builder**. This goes beyond “checked” or “rated” and demonstrates my company has been professionally vetted by the Federation of Master Builders (FMB), the UK’s largest trade organisation in the building industry.

My Master Builder badge is a sign of trust, quality, protection, and experience.

Trust Choosing a builder is an act of trust. The FMB has been successfully bringing clients and builders together since 1941.

Quality There is no building more important than yours. That is why the FMB goes beyond simple checks and ratings, by professionally vetting members. I have passed their joining criteria.

Protection As a Master Builder, I can offer you warranty over my work through FMB Insurance Services. Free Contracts and a Disputes Service are available too.

Experience You want to build the best you can. So do I. And that is why, as a Master Builder, I abide by a unique Code of Practice so you can be assured you’ve chosen with confidence.

Finally, I can provide you with personal references and examples of my building projects, please ask me for more details, or you can check my membership at www.fmb.org.uk/checkamember
