

Urban Forestry Group[®] What we do works											Notes: 1. Felling and pruning of trees and hedgelines should take into account the bird – nesting season which is Jan to the end of August; please refer to the Wildlife and Countryside Act 1985 2. Trees overhanging pavements and roads should be kept free of deadwood greater in diameter than 25mm, including any dead, dying, hung up or structural weak timber that could foreseeably be seen as a risk to both pedestrian and road users. This also includes maintaining a minimum 2.5m branch clearance over the pavement and a minimum 5.5m clearance over the road including where applicable; an appropriate branch clearance around street lights to allow adequate light filtration.

BS 5837 : 2012Tree Survey Appendix:															
Ref: -															
Site: 63 Clyde Rd, West Didsbury, M20 2WW															
Client: Mr. Paul Cox															
Date of Survey: 03/02/2021 - with due to COVID lockdown restrictions tree survey information provdied by the Client following guidance provided by Urban Forestry Group. Trunk Diameters have been calculated from the tree trunk circumerfences provided. [Processed on the 12th Feb 21].															
Drawing Ref: DW/PI/CR/004/BSTS_r1															
Tree Number:	Crown Clearance in metres:	First Branch + Direction of Growth:	Tree Species Latin & Common Name:	Height in metres:	Tree Trunk Diameter:	Branch Spread in m:				Age Class:	General Observations & Preliminary Management Recommendations:	Estimated Remaining Contributiion Years:	Category Grading:	Boundary Position	
						N	E	S	W						
1	2.5m	3m.SW.3m	SILVER BIRCH <i>Betula pendula</i>	9m	213mm	2m	2.5m	2.5m	2.5m	Mature	Single trunked tree that is 500mm in from the fence. It is leaning away from the fence slightly within the site boundary. From the photographs provided, no identified defects or disorders and no recommended tree surgery work at present.	20 Years	B2	In	
2	1.5m	1.2m.SW.3m	WILD CHERRY <i>Prunus avium</i>	6.5m	280mm	4.5m	3m	3m	4m	Mature	Single trunked tree up to approx 1.2m height that then form several upward trunks that is1.2m from rear garden wall and 2.1m from neighbouring fence. The area around the tree base has been paved upto the trunk. From the photographs provided, no identified defects or disorders and no recommended tree surgery work at present.	20 Years	B2	In	
Trees should be re-inspected on an annual basis unless otherwise specified; by a suitably qualified arboriculturist, providing up to date tree survey recommendations.						Notes: It is recommended to obtain a more detailed inspection and recording of this timber decay as part of tree monitoring program, please contact the above office telephone number to obtain a quotation.
