

NOTES:
The location refuse bins is as shown above within the green rectangle. This is where bins currently are located which is the front of the the garage situated at the rear of the property. The bins will be taken to front of the house on collection day from there. This will be done by the resident who is the owner of the property. He will also be responsible for bringing back to the storage are once the bins are emptied. The new extension will not impact the usual route of bins movement on refuse collection dates. As in all residential properties in Manchester City Council, bins are placed alongside the roads/streets on collection day to be emptied by M/cr City refuse collection team.
