

1.9 Design Response & Justification - 24hr Access

Comment

Twenty-Four Hour Access To Cathedral Entrances

The Cathedral is a 'working cathedral' which requires access to all entrances twenty-four hours a day, especially to the south where deliveries are taken.

Response

The Cathedral will be able to function as a fully working Cathedral as the southern drop bollards (circled in blue) will be kept lowered on a day to day basis. The adjacent route shows that vehicles will be able to enter and turn as required, and the removable bollards adjacent to Cathedral Square will remain upright except for special events.
