1.0 Introduction

1.1 Instruction

WYG Environment (WYG) was commissioned by National Grid Property Holdings Ltd (NGPH) to prepare a Land Condition Summary Statement (LCSS) for their site at Gould Street, Manchester.

1.2 Development Proposals

The proposed development for the site comprises of the construction of two Pressure Reduction Stations (PRS) on the two land parcels at Gould Street, Manchester. Detailed information on the construction is not available but it is understood that the two PRS's will comprise of pressure reduction installations housed within prefabricated GPR kiosks, each PRS will be surrounded with secured palisade fencing and ground surface will comprise hardstanding and/ or gravel. It is assumed that occupation of the PRS's is limited to short maintenance visits and there will be no potable water supply.

1.3 Data Sources

This LCSS presents a summary of information from the following reports which forms the basis for the geo-environmental risk assessment presented at Chapter 2.

- Amec, October 2011. Gould Street, Manchester (Site Code: 0011) Final Verification Report (Ref: S05760rr577i3)
- Entec, February 2003. Environmental Assessment of Gould Street, Manchester (Mentor No. 3642) Site Investigation Report Factual Vol 1 & 2 (Ref: 05760rr183i1)
- Envirocheck Report (2020), Landmark Information Group

1.4 Terms and Conditions

This report has been prepared for NGPH in accordance with the terms and conditions of the Framework Contract agreement between NGPH and WYG (2017-2020). The assessment is based on the land use(s) and assumptions as defined herein and should not be used in any different context. Also, in time, variations or updates to relevant legislation may necessitate re-assessment.

Although reasonable efforts have been made to check the accuracy of the information contained herein, no explicit checks have been carried out to verify the accuracy of information obtained from third parties and no liability can be accepted for any consequential errors or misinterpretation.

2.0 Interpretative Land Condition Summary Statement

Introduction	
Site Name and Property Reference	The site comprises of National Grid Property Holdings (NGPH) land at Property Reference 0011. The site address is Gould Street, Manchester, Greater Manchester, M4 4JD. The site location is shown on WYG Drawing No. 784-B024707-LDS-N-02.
Site Location and Description	The site comprises of 2No. discreet land parcels; an area in the east covering an area of 0.12 hectare (Ha) and an area in the west covering an area of 0.04 Ha. The western land parcel comprises of a L-shaped area of land separated roughly in half in a northwesterly to southeasterly direction by palisade fencing. The western half of this area is vacant and comprises of dense vegetation. The eastern half of this area comprises of dense vegetation surrounding a hard surfaced car park (currently operated by CCP). The eastern land parcel comprises of disused land with an operational pigging compound in the southeast corner, separated with wire mesh fencing. A mast compound is present in the centre of the site secured with palisade fencing topped with barbed wire. Along the eastern boundary of the site are storage bays containing fly tipped rubbish, two wire mesh cages are present in two of the bays. The surface cover across this area of the site comprises of concrete and asphalt which were noted to be in good condition. Within the pigging compound the surface cover is coarse gravel of mixed lithologies, areas of broken brick and fly tipped material are present across this area. A plan of the site layout is shown on WYG Drawing No. 784-B024707-LDS-N-02. Appendix E presents photographs of the site taken during a site walkover on 19th November 2020.
Context and Objective	The objective of the LCSS is to present existing factual geo-environmental site information which is used to inform a contaminated land risk assessment in consideration of the proposed construction of two Pressure Reduction Stations (PRS) at the site.
Proposed End Use	It is understood that the site is to be developed to include the installation of two secure PRS compounds. The compounds will comprise of pressure reduction installations housed within kiosks, each PRS will be surrounded with secured palisade fencing. Ventilation of the kiosks has been incorporated into the designs. It is assumed that: • The site will be occupied on an infrequent basis for the undertaking of routine and maintenance works. • The site will be adequately secured. • Relevant risk assessments, safe ways of working and appropriate control measures will be utilised where on-site workers are working in excavations including the use of personal protective equipment and occupational hygiene measures. • The onsite kiosk will incorporate adequate ventilation (vents, air bricks etc.). • Any change of use and additional buildings by the future owners will only occur after the site has been through the planning process.
Site Conditions	
Site History	Information relating to the historic development of the site has been collated from various historical information and plans. The location of historical structures is shown

	on WYG Drawing No. 784-B024707-LDS-N-03. Eastern land parcel The earliest historical map dated 1848 shows the site is part of a larger gas works site (Rochdale Road Gas Works). The land parcel is occupied by retorts and garages from 1893 until 1938. Gas works related structures on the site prior to 1893 are not labelled on historical plans. A meter house occupies the site until 1948-1952 when a storage hopper for coal and conveyor belts are constructed. It is understood at this time the area was used for coal storage. The hopper and conveyor belt were removed from the site by 1968 and the site is shown as vacant. The south eastern corner of the site is shown as a separate area on the 1983-1989 map and is assumed to be the pigging compound. An unidentified structure is present on the eastern boundary of the area. Aerial photography from 2000 shows the western half of this area to comprise of an area of heavily vegetated land and car parking. Western land parcel The earliest historical map dated 1848 shows the site is part of a larger gas works site, the western land parcel was occupied by an office building in the southern half and a larger building in the northern half identified as a process building and later housing purifiers (1908). The building in the southern half is shown on historical site drawings as stores and a canteen in 1958. The buildings onsite were demolished between 1983 and 1988 where the site is shown as vacant. The western half of the site is occupied by dense vegetation while the eastern half is used for car parking.
Geology	Information regarding the geology of the site has primarily been sourced from the geological map of the area supplemented with historical borehole records from previous ground investigations. **Made Ground** The Made Ground in the western land parcel was described in TP39 located in the south as clayey gravel with brick, concrete, ash and linoleum tiles to a depth of 2.0mbgl (42.83m AOD). BH507 located in the northern half of the western land parcel encountered Made Ground as sandy gravel of concrete, brick and spent coal/clinker. The depth of the Made Ground was proven in this location to 3.2m bgl. The Made Ground in the eastern land parcel comprises of sand and gravel of ash and clinker with occasional cobbles of brick. The Made Ground in WS13 was encountered to a depth of 2.0m bgl (43.64m AOD), base unproven. A concrete base was encountered in TP11 at a depth of 1.9m bgl (44.01m AOD), overlying this was Made Ground comprising of burnt brick assumed to have originated from the former retorts. **Superficial Deposits** Geological mapping shows the site to be underlain by Devensian Glacial Till Deposits comprising of gravels, sands, silts and clays. Superficial deposits have only been encountered in BH507 in the western land parcel and described as firm to stiff sandy clay to a depth of 13.25m bgl. Sand lenses and bands or slightly sandy slightly gravelly clay are present from 8.4m bgl. **Bedrock** Geological mapping shows that the bedrock underlying the site comprises of the Chester Sandstone Formation. According to the British Geological Survey (BGS) the thickness of this unit varies between 50m and 220m. Weathered sandstone was encountered in BH507 as red brown fine to medium sand at a depth of 13.25m bgl.
Hydrogeology	The Chester Sandstone Formation is classified as a Principal Aquifer, defined by the

	Environment Agency as having high intergranular and/or fracture permeability which usually provide a high level of water storage. They may support water supply and/or river base flow on a strategic scale. The Glacial Till underlying the site is classified as a Secondary Undifferentiated Aquifer. During the Amec 2010 supplementary site investigation groundwater strikes were recorded within the superficial deposits at 3.3m bgl and 7.3m bgl. Subsequent groundwater monitoring was not undertaken in either BH507 or WS13. Given the cohesive nature of the clay it is assumed that groundwater is perched within more permeable strata. The nearest groundwater abstraction to the site is located 683m northwest for general cooling at Derby Brewery.
Hydrology	The River Irk is located approximately 96m northwest of the site. The Environment Agency assessed the overall water body as Moderate in 2019, with an ecological quality of Moderate and chemical quality of Fail. The site is located in a flood zone 1, which is defined as having a less than 1 in 1,000 annual probability of flooding.
Ground Investigation	**Entec Ground Investigation, 2003** The ground investigation within the subject areas comprised of the following: Eastern land parcel • 1No. window sample hole (WS13) to a depth of 2.0m bgl • 1No. trial pit (TP11) to a depth of 1.9m bgl • 1No. hand dug pit (HDP03) to a depth of 1.1m bgl • Western land parcel1No. trial pit (TP39) to a depth of 2.0m bgl TP39 located in the western land parcel encountered Made Ground to a depth of 2.0m bgl (42.83m AOD), the base of the Made Ground was unproven. In the eastern land parcel a concrete base was encountered in TP11 at a depth of 1.9m bgl (44.01m AOD), overlying this was Made Ground comprising of burnt brick assumed to have originated from the former retorts. WS13 located in the eastern land parcel was recorded as having a strong naphthalene odour. Chemical analysis of Made Ground samples from this location recorded a concentration of 780mg/kg for naphthalene. Gas and vapour monitoring in WS13 recorded readings of 0.5% v/v for carbon dioxide; 19.9% v/v for oxygen and 0% v/v for both methane and hydrogen sulphide. The area surrounding WS13 was remediated in 2010/2011 (see section below for details). **Amec, Supplementary Site Investigation, 2010 (undertaken during remedial works phase)** A single borehole (BH507) was progressed in the western land parcel to the rear of the former office block to delineate the lateral and vertical extent of organic contamination in the superficial deposits identified in the wider site area during the remedial works. Made Ground was encountered to be 3.2m in thickness and comprise of dark brown/black/red sandy gravel of concrete, brick and spent coal/coke. Natural deposits comprising of firm to stiff clay with layers/ lenses of less cohesive material and sand lenses present. Weathered sandstone was encountered as red brown fine to medium sand at a depth of 13.25m bgl. Laboratory analysis of the soil samples showed low concentrations of contaminants; below the derived target criteria and in many cases below the laboratory limit of

	detection. A plan showing the location of the exploratory holes is presented on WYG Drawing No. 784-B024707-LDS-N-04.
Remediation Works	In order for the site to meet commercial end use criteria voluntary remediation works were undertaken on the surrounding former gas works site area between 2010 and 2011 by National Grid. Remediation target criteria for soils were derived for the site based on values protective of both human health (commercial/industrial land use) and controlled water receptors. Works on the subject site focused on an L-shaped area in the eastern land parcel, the area is referred to as WS13 Area in the Verification Report (AMEC, 2011) and is shown on Drawing No 784-B024707-LDS-N-05 held in Appendix A. Previous ground investigation identified elevated concentrations of naphthalene within the Made Ground, an area identified as the former coal storage. The remediation works comprised the excavation of a 10m by 10m area and removal of a total of 92m^3 of material. It is reported that no identifiable source of contamination was present during the excavation. The excavation was backfilled with site-won 'ballast'. Validation testing of Made Ground samples at depths of 0.6m bgl and 2.45m bgl (validation samples: WS13S1 and WS13S2) were found to be below the remediation target criteria.
Contamination	
Visual Observations	The Made Ground associated with a reported strong naphthalene odour in WS13 during the Entec 2003 site investigation was subsequently removed as part of the remediation works. Validation results from the excavations did not identify any significant residual contamination. In the eastern land parcel, burnt brick and gravels of spent coal/coke was identified in Made Ground between 0.1m bgl and 3.3m.
Source and type of contamination	The following sources have been identified on the site: • Source 1 – Made Ground (outside of remediated area) • Source 2 – Potential asbestos in Made Ground • Source 3 – Contaminated groundwater associated with leaching of contaminant from the Made Ground
Description of location and extent of contamination.	Made Ground has been encountered across both site areas however areas where elevated concentrations of contaminants were identified in previous site investigations were addressed as part of the previous remediation works. Remedial target criteria were based on site specific derived values protective on controlled water receptors and human health receptors under a commercial/industrial land use. There remains a small residual risk that previously unidentified contamination is present within areas between exploratory hole locations and remediation excavations. No specific laboratory based asbestos testing has been undertaken at the site therefore there is potential for asbestos within the Made Ground to be present given the sites former use as part of a gasworks, however no visible Asbestos Containing Materials (ACMs) has been identified in previous investigations. Contaminant leaching and downward migration of contaminants from the Made Ground sources is likely to have occurred on the site to some degree, however the Glacial Till (10m thick (base unproven) on eastern land parcel) comprising of firm to stiff clay is expected to create a relatively impermeable barrier to downward migration of dissolved phase contaminants. There is anticipated to be some degree of contamination impacting the groundwater underlying the two site areas as a result of migration from the wider gas works area.

Risk Assessment

Conceptual Site Model (CSM)

Information from previously completed phases of site investigation have been used to characterises the source, pathways and receptors. A summary of the potentially complete Contaminant Linkages which have the potential to adversely and significantly affect identified receptors is presented below in Table 1.

Table 1: Complete/ Potentially Complete Contaminant Linkages

CSM Sources	CSM Pathways	CSM Receptors
Source 1 – Contaminated Made Ground	Direct contact/inhalation/ingestion	Onsite workers
		Onsite workers in excavations
	Leaching/dissolution of contaminants	Secondary Undifferentiated Aquifer Surface Water
Source 2 – Potential asbestos in Made Ground	Dust/fibre inhalation	Onsite workers
		Onsite workers in excavations
Source 3 – Contaminated groundwater	Migration to aquifer	Secondary Undifferentiated Aquifer
	Migration in groundwater	Surface Water

The CSM defined above has been used as the basis of a Qualitative Assessment to evaluate risks posed by complete and potentially complete Contaminant Linkages. The CSM is based on the following as informed by the site information and development proposals:-

- There is not considered to be a plausible pathway via which contaminants from the Made Ground on the subject site can significantly impact the Principal Aquifer due to the thickness and cohesiveness of the overlying Glacial Till.
- The development comprises the construction of hardstanding or imported gravel surfacing which will break the direct pathway via which future users could be exposed to contamination in the Made Ground.
- The site will be secured with 2m high palisade which will effectively prevent trespassers accessing the site.
- Groundwater is at a depth of c.3.0m bgl therefore the likelihood of onsite workers coming into direct contact is extremely unlikely.
- The design of the kiosks incorporates suitable ventilation preventing the accumulation of gases.
- There will be no potable drinking water supply to the PRS's.

Consequence / Probability	Severe	Moderate	Mild	Negligible
Almost Certain	Very High Risk	High Risk	Moderate Risk	Low Risk
Likely	High Risk	Moderate Risk	Moderate/Low Risk	Low Risk
Unlikely	Moderate Risk	Moderate/Low Risk	Low Risk	Very Low Risk
Very Unlikely	Moderate/ Low Risk	Low Risk	Very Low Risk	Very Low Risk
Extremely Unlikely	Very Low Risk	Very Low Risk	Very Low Risk	Very Low Risk

The risk assessment assumes the following mitigation as informed by the site

	information and development proposals: • The site will be occupied on an infrequent basis to undertake maintenance and emergency works. • Risks to workers in excavations during the construction phase and for future maintenance of below ground services are effectively minimised by risk assessment and the use of appropriate PPE and RPE as required. • It is anticipated that there are potential pathways within groundwater to local surface water receptors however groundwater flow is expected to be slow and arduous due to the presence of localised cohesive materials and relict and current in-ground structures.

Area/ Structure Relating to Source Plan	Critical Receptor	Pathway	Potential Effect	Potential Consequence of Complete S-P-R Linkage	Potential Likelihood of Complete S-P-R Linkage	Risk Classification	Comments/ Recommendations
Source 1 – Contaminated Made Ground	Onsite workers Onsite workers in excavations	Direct contact/inhalation/ingestion	Adverse health effects	Mild	Unlikely	Low	Areas of gross contamination have been previously remediated. A competent surface cover (hardstanding/ imported gravel) is proposed under final site conditions limiting the potential for direct contact. Any works involving excavations are assumed to follow risk assessments and adopt the appropriate PPE and RPE.
	Secondary Undifferentiated Aquifer	Leaching/dissolution of contaminants	Damage to the water environment	Mild	Likely	Moderate/Low	Groundwater is perched with granular horizons and lenses within the Glacial Till thus limiting the migration of contaminants. Should competent hardstanding be present under the final site conditions the likelihood would reduce to very unlikely as rainwater infiltration and leachate generation from Made Ground would be significantly reduced.
	Surface Water	Leaching/dissolution of contaminants followed by migration in groundwater		Mild	Unlikely	Low	The groundwater between the site and the nearby River Irk is assumed to be discontinuous and slow due to the presence of the Glacial Till at the site.

Area/ Structure Relating to Source Plan	Critical Receptor	Pathway	Potential Effect	Potential Consequence of Complete S-P-R Linkage	Potential Likelihood of Complete S-P-R Linkage	Risk Classification	Comments/ Recommendations
Source 2 – Potential asbestos in Made Ground	Onsite workers Onsite workers in excavations	Dust/fibre inhalation	Adverse health effects	Severe	Very Unlikely	Moderate/Low	Competent cover layer (hardstanding/imported gravel) proposed under final site conditions which will limit dust generation. Any works involving excavations are assumed to follow risk assessments and adopt the appropriate PPE and RPE. Due to the lack of asbestos analysis it is recommended that air monitoring and dust sampling is undertaken to assess the risks from asbestos to onsite workers during the development of the site.
Source 3 – Contaminated groundwater	Secondary Undifferentiated Aquifer	Migration to aquifer	Damage to the water environment	Mild	Likely	Moderate/Low	Groundwater is assumed to be perched in less cohesive lenses and horizons within the Glacial Till.
	Surface Water	Migration in aquifer		Mild	Unlikely	Low	The groundwater between the site and the nearby River Irk is assumed to be discontinuous and slow due to the presence of the Glacial Till at the site.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination.
For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.
In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

Scottish Natural Heritage Copyright

Contains SNH information licensed under the Open Government Licence v3.0.

Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England.

Natural Resources Wales Copyright Notice

Report Version v53.0

Summary

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Agency & Hydrological					
BGS Groundwater Flooding Susceptibility	pg 1	Yes	Yes	Yes	n/a
Contaminated Land Register Entries and Notices					
Discharge Consents	pg 4		17	22	42
Prosecutions Relating to Controlled Waters			n/a	n/a	n/a
Enforcement and Prohibition Notices					
Integrated Pollution Controls					
Integrated Pollution Prevention And Control					
Local Authority Integrated Pollution Prevention And Control					
Local Authority Pollution Prevention and Controls	pg 24		4	3	10
Local Authority Pollution Prevention and Control Enforcements	pg 26				1
Nearest Surface Water Feature	pg 26		Yes		
Pollution Incidents to Controlled Waters	pg 27		2	3	16
Prosecutions Relating to Authorised Processes	pg 30			1	
Registered Radioactive Substances	pg 30		1	1	
River Quality	pg 31		1		5
River Quality Biology Sampling Points	pg 32				1
River Quality Chemistry Sampling Points	pg 33		1		
Substantiated Pollution Incident Register	pg 33			5	1
Water Abstractions	pg 34				25 (*17)
Water Industry Act Referrals					
Groundwater Vulnerability Map	pg 45	Yes	n/a	n/a	n/a
Groundwater Vulnerability - Soluble Rock Risk			n/a	n/a	n/a
Groundwater Vulnerability - Local Information			n/a	n/a	n/a
Bedrock Aquifer Designations	pg 45	Yes	n/a	n/a	n/a
Superficial Aquifer Designations	pg 45	Yes	n/a	n/a	n/a
Source Protection Zones					
Extreme Flooding from Rivers or Sea without Defences	pg 45		Yes	n/a	n/a
Flooding from Rivers or Sea without Defences	pg 45		Yes	n/a	n/a
Areas Benefiting from Flood Defences				n/a	n/a
Flood Water Storage Areas				n/a	n/a
Flood Defences				n/a	n/a
OS Water Network Lines	pg 45		1	6	36

Summary

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Waste					
BGS Recorded Landfill Sites	pg 51				1
Historical Landfill Sites	pg 51			2	2
Integrated Pollution Control Registered Waste Sites					
Licensed Waste Management Facilities (Landfill Boundaries)					
Licensed Waste Management Facilities (Locations)	pg 52		3	4	
Local Authority Landfill Coverage		1	n/a	n/a	n/a
Local Authority Recorded Landfill Sites					
Potentially Infilled Land (Non-Water)	pg 53			2	11
Potentially Infilled Land (Water)	pg 54		2	6	43
Registered Landfill Sites					
Registered Waste Transfer Sites	pg 56		3		1
Registered Waste Treatment or Disposal Sites					
Hazardous Substances					
Control of Major Accident Hazards Sites (COMAH)					
Explosive Sites					
Notification of Installations Handling Hazardous Substances (NIHHS)					
Planning Hazardous Substance Consents					
Planning Hazardous Substance Enforcements					

Summary

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Geological					
BGS 1:625,000 Solid Geology	pg 59	Yes	n/a	n/a	n/a
BGS Estimated Soil Chemistry	pg 59	Yes	Yes	Yes	Yes
BGS Recorded Mineral Sites	pg 62				11
BGS Urban Soil Chemistry	pg 64		Yes	Yes	Yes
BGS Urban Soil Chemistry Averages	pg 67	Yes			
CBSCB Compensation District			n/a	n/a	n/a
Coal Mining Affected Areas	pg 67	Yes	n/a	n/a	n/a
Mining Instability	pg 67	Yes	n/a	n/a	n/a
Man-Made Mining Cavities					
Natural Cavities					
Non Coal Mining Areas of Great Britain				n/a	n/a
Potential for Collapsible Ground Stability Hazards	pg 67	Yes	Yes	n/a	n/a
Potential for Compressible Ground Stability Hazards	pg 67	Yes		n/a	n/a
Potential for Ground Dissolution Stability Hazards				n/a	n/a
Potential for Landslide Ground Stability Hazards	pg 67	Yes	Yes	n/a	n/a
Potential for Running Sand Ground Stability Hazards	pg 68	Yes	Yes	n/a	n/a
Potential for Shrinking or Swelling Clay Ground Stability Hazards	pg 68	Yes	Yes	n/a	n/a
Radon Potential - Radon Affected Areas			n/a	n/a	n/a
Radon Potential - Radon Protection Measures			n/a	n/a	n/a
Industrial Land Use					
Contemporary Trade Directory Entries	pg 69		54	144	461
Fuel Station Entries	pg 124		2	1	5
Points of Interest - Commercial Services	pg 125		17	33	54
Points of Interest - Education and Health					
Points of Interest - Manufacturing and Production	pg 134		20	19	126
Points of Interest - Public Infrastructure	pg 148		3	11	10
Points of Interest - Recreational and Environmental	pg 150			4	9
Gas Pipelines					
Underground Electrical Cables					

Summary

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
Sensitive Land Use					
Ancient Woodland					
Areas of Adopted Green Belt					
Areas of Unadopted Green Belt					
Areas of Outstanding Natural Beauty					
Environmentally Sensitive Areas					
Forest Parks					
Local Nature Reserves					
Marine Nature Reserves					
National Nature Reserves					
National Parks					
Nitrate Sensitive Areas					
Nitrate Vulnerable Zones	pg 152	1			1
Ramsar Sites					
Sites of Special Scientific Interest					
Special Areas of Conservation					
Special Protection Areas					
World Heritage Sites

Lancashire And Furness

Published 1892 - 1893

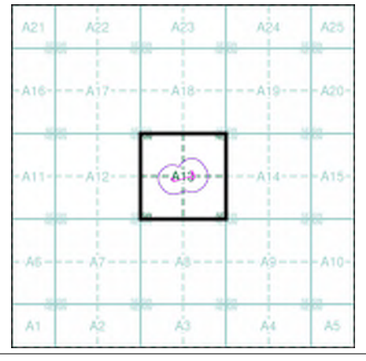

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840`s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordnance Survey Plan

Published 1968 - 1990

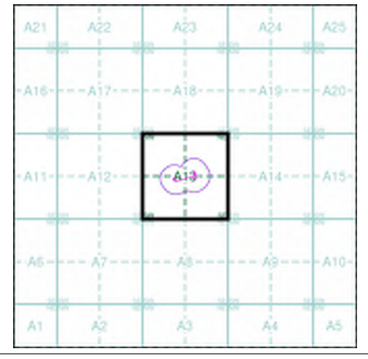

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840`s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of Unpublished Survey Information

Published 1973

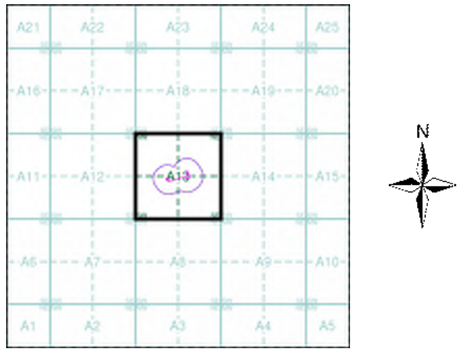

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a `work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1992

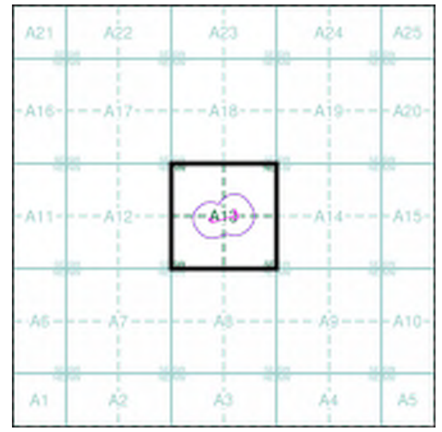

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Lancashire And Furness

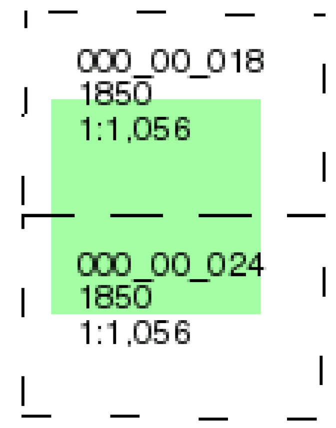

Published 1850

Source map scale - 1:1,056

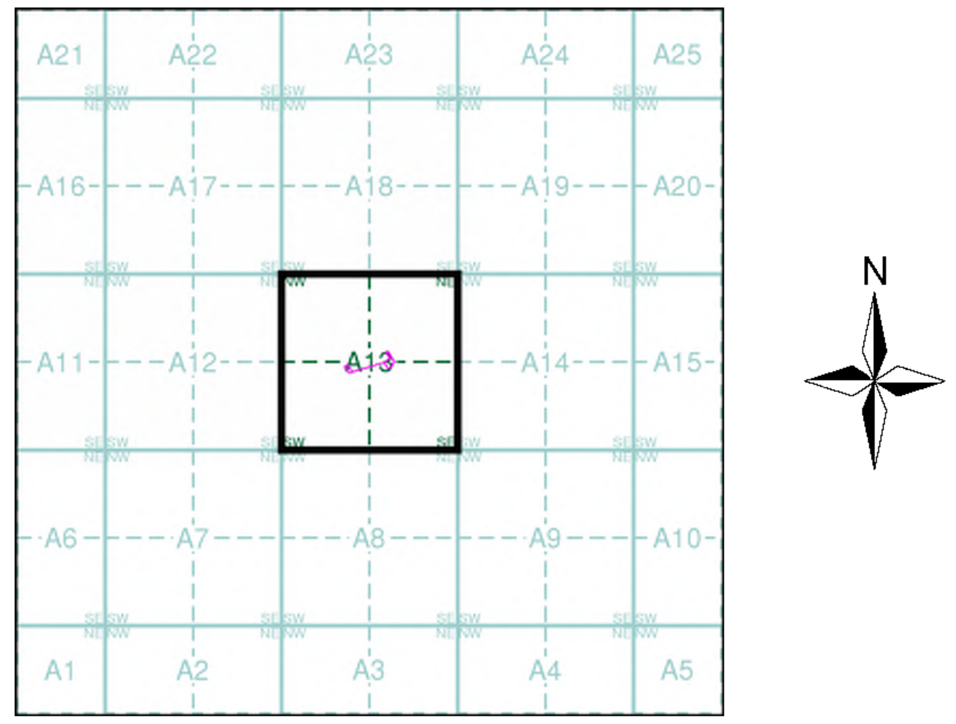

The 1:1056 scale of Ordnance Survey mapping was adopted from Ireland in 1848 and was used to survey towns with a population of over 4000, plus county towns of lesser population, in those counties mapped at the six-inch scale in 1841-55. The scale was the largest scale at which London was mapped by the Ordnance Survey and a 'skeleton' survey of the capital, showing little more than streets, street names, frontages and altitudes, was undertaken between 1848 and 1850. The majority of the 1:1056 surveys were later replaced by 1:500 surveys; although almost all the remainder were revised at this scale, sometimes more than once before 1895. The type of detail shown on the 1:1056 scale is broadly similar to that on 1:500; the apparent omission of minor details such as sewer access points and street lights may be as much a reflection of the generally earlier date of these plans, as of the specification of the map.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Lancashire And Furness

Published 1891

Source map scale - 1:500

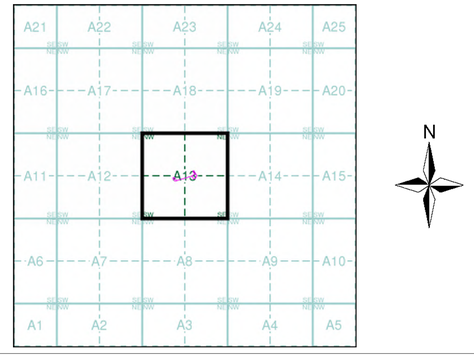

The 1:500 scale Ordnance Survey mapping was introduced in 1855 as a replacement for the 1:528 scale and to compliment the 1:2500 scale that had been implemented in 1853. By 1895, the 1:500 scale covered most towns over a population of about 4000 at the time of survey, although very few towns were mapped more than once at this scale, and none have been since 1910. The 1:500 scale gives particular emphasis to such features as lamp posts, man holes, arched passages and minor building projections. Also often featured are divisions between tenements, interior ground floor layouts of public buildings, and on earlier plans, the functions of the various parts of larger industrial premises are also indicated. Content of the plans does vary however, from one town to the next in terms of, for example, the completeness of railway tracks and the coverage of public buildings.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Lancashire And Furness

Published 1848

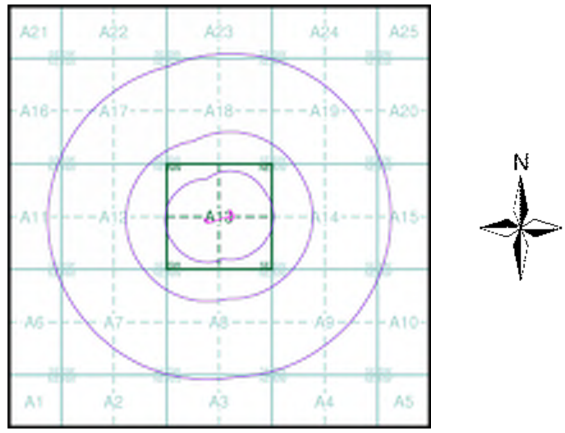

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840`s. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940`s, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940`s, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

0 400 m

Manchester

Published 1975

Source map scale - 1:25,000

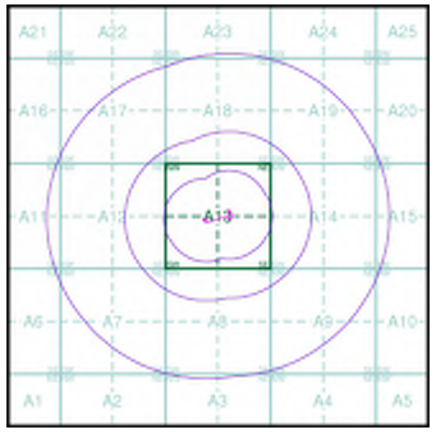

These maps were produced by the Russian military during the Cold War between 1950 and 1997, and cover 103 towns and cities throughout the U.K. The maps are produced at 1:25,000, 1:10,000 and 1:5,000 scale, and show detailed land use, with colour-coded areas for development, green areas, and non-developed areas. Buildings are coloured black and important building uses (such as hospitals, post offices, factories etc.) are numbered, with a numbered key describing their use.
They were produced by the Russians for the benefit of navigation, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land-based personnel, on the ground, in the cities that are mapped.

VectorMap Local

Published 2020

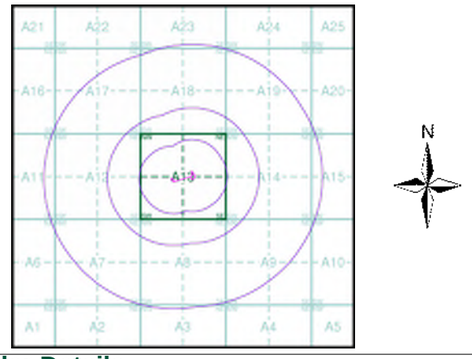

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a simple vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large-scale information surveyed at 1:1250 scale (covering major towns and cities),1:2500 scale (smaller towns, villages and developed rural areas), and 1:10 000 scale (mountain, moorland and river estuary areas).

Depth (m)	No.	Description
0.00-0.20	1	MADE GROUND: Two layers of asphalt
0.20-0.40	2	MADE GROUND: Sandy clayey gravel, orange brown and moist
0.40-1.90	3	MADE GROUND: Sandy gravel of ash and brick rubble to whole brick. Some curved bricks. Vertical 30mm diameter pipe noted At 1.90m bgl: concrete

Groundwater
No. Struck Behaviour

Remarks
Stability : stable, Shoring : no

Notes : For explanation of symbols and abbreviations see key sheet. All depths in metres.

Scale 1 : 50
