

Pollution Control Measures

The Shed, Reliance Street, Newton Heath.

To stop any pollutants entering the drainage network from the proposed garage the owners will conform to the SPILL RESPONSE PROCEDURE (see next page)

To help any oil spills or any other pollutants which could make their way into the drainage system we have added a small ramped area up to the roller shutter door from the access road and a small ramp up to the roller shutter internally. If any oil is spilt internally it will not be able to make its way from the building and can be cleaned once found. Risk assessments must be undertaken by the owner with regards to storage and use of any pollutants. They must be transported in sealed units and stored in a location away from the watercourse or any drains.

The use of drain mats near to manholes and gullies should be considered within the risk assessments and any spills must be contained as soon as they happen to reduce and spread. Any damaged containers must be sealed as soon as damaged or the contents placed in a new sealed container if possible. Any leak which is spreading can be temporarily blocked with the use of a boom or sandbag until the pollutant can be cleaned and disposed off in the correct manor.

Spill Response Procedure

If the spill cannot be safely contained or if the spill is causing a threat to life, evacuate the area and call **999** from a safe location

IF SAFE TO DO SO

STOP > CONTAIN > NOTIFY > CLEAN-UP

STOP

- Stop work immediately
- Stop the leak or eliminate the source of the spill
- Eliminate ignition sources and provide natural ventilation

CONTAIN

- Use pollution control equipment (e.g. spill kits, drip trays, bunds of earth and sand) to contain the spill
- Check the spill has not reached any drains, water courses or other sensitive areas
- Cover all drains / manholes to prevent the spill from entering the drainage system

NOTIFY

- Once the spill has been contained notify your emergency contact. Details at the bottom of the page.

CLEAN-UP

- Attempt to soak up the spill using absorbent material
- Always follow your Duty of Care for waste when disposing of contaminated materials including spill kit/equipment.
