1 **SUMMARY**4

1 SUMMARY

Hyperoptic Ltd have applied and liaised with BT Openreach Property Development Department for Barclay House, Manchester to bring in all required incoming Telecommunications involved within the residential scheme including the additional 13 No. apartments to the scheme. Fibre and all associated ducting into the property for both the internal and external infrastructure.

Virgin Media can also be applied for if required by the client.

BT Openreach will be served by Fibre to the Premises (FTTP). A speed of at least 18 MBP/S can be guaranteed on site.

This will provide the following:

- The infrastructure that delivers standard telephony services
- A cable television network
- A dedicated 'multi-services' broadband network
- Mobile telephony, wireless and satellite to offer flexibility

Due to the location of the building and the infrastructure within the area there will be no issues with Broadband or Telecoms connections.
