

COLOUR KEY

- Existing section of glazing replaced with new, single opening light to double opening light
- Film applied to existing double glazed units

Scope of works:

New opening windows to be manufactured off site to match existing. All double glazed units to new windows to finished externally with 3M Prestige 40 film to match treatment to existing double glazed units.
(new windows indicated in dark blue on reference elevation)

Application of solar control film externally to existing windows (indicated in light blue on reference elevation). Beading to be removed and re-instated once film is applied to full extent of double glazed unit. Any damaged elements in the course of the above to be replaced with new.

Floor spandrel areas of curtain wall screens to be replaced with powder coated aluminum panels introducing mullions lining through with glazing verticals, all to match existing in colour and profile.

TYPE 01 window modification (28No.) - Replace existing windows within curtain wall with new 2 no. stacked opening lights.

TYPE 01A window modification (14No.) - Replace existing windows within curtain wall with new 2 no. stacked opening lights. Replace existing fixed unit to curtain wall return with 2 no. stacked opening lights.

TYPE 02 window modification (7No.) - Replace existing windows with new 2 no. stacked opening lights.
