Hi guys,

Please see our response to recent invalid letter.

1) Details of acoustic insulation measures are required.

Further to your e-mail dated 6 February 2020, a similar noise report to the report carried out for the front of the property in relation to noise transfer to the upper and I have spoken with Carl today regarding this today. The space in question is a single story building which has no adjoining neighbours on any of the walls nor does it have any flats/resid please let us know and we can provide these.

2) Please provide details of the cycle parking. Further to your e-mail dated 6 February 2020, details of in curtilage cycle parking for staff is required.

Please see attached photo. We have worked with Ikhlas Ur-Rahman, the neighbourhood officer from MCC and we have installed planters at the front of our building to reduce pavement bikes (please see attached also).

Thanks
Oddie
