TRANSPORT MOVEMENTS
-----General,

Blackly New Road is a feeder road from Prestwich to Blackley.

It has buses and mainly cars. Locally the road in-front of this group of terraced property has been allocated to the terrace for car parking on the road and is divided from the road with white lines.

At present there is a flat over a commercial off licence. This results in a re-use of the parking facilities for the flat to one of the house and a replacement of the lorry, van and shoppers vehicles to the shop with 2 cars.

These are also allocated at the front, but can also be on the side street, Surrey Street and off the main Blackley New Road.

There is no intended increase in traffic movements, intact it is a reduction of movements by the removal of a commercial operation.
