

Proposed Conservation Rooflights

VELUX conservation roof windows for traditional buildings. When planning dictates that a window of traditional external appearance is required, conservation roof windows should be considered. All of our conservation roof windows have the same technical features of a VELUX roof window but in a traditional black conservation style.

- Available in either centre-pivot or top-hung.
- Black external profiles and glazing bar (RAL 9005).
- Recessed installation for flat appearance on traditional slate roofs.
- Top-hung roof windows are suitable for emergency escape.

Conservation rooflights from Velux include:-

- Roof window with pre-fitted glazing bar.
- Laminated safety glazing as a standard feature.
- Insulation collar and underfelt collar for a weathertight/energy efficient installation.
