Dear Matt

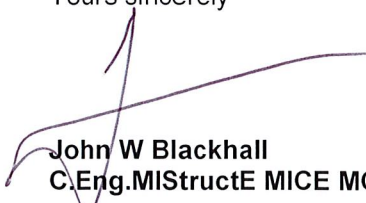

**16-6878 – ICON ALPHALSG PLOT 4, MANCHESTER - EARTHWORKS
VALIDATION**

Following receipt of the Earthworks Completion report produced by Crossfield Consultants reference CCL03214.CK41 dated January 2020, I have reviewed their report and the independent testing results (carried out by UKAS accredited test house - Construction Testing Solutions Ltd).

Sampling and testing were carried out throughout the duration of the works and I can confirm that the completed works and the subsequent test results confirm that the ground works meet the required performance level to safely and adequately support the new structure and meet the specification requirements for the project,

If you require any further confirmation/clarification please let me know.

Yours sincerely

John W Blackhall
