17th April 2020

For the Attention of Julia Roscoe,

In respect of the following planning notice we received dated the 16th April 2020 from yourself, planning application number 126431/FO/2020, 126432/AO/2020.

I received your letter today on the 17th April 2020 in respect to the above planning application of an erection of a multi-use arena and installation of 3 x LED Screens, I do not have an objection of the building being done, but do have one concern that affects us already with parking on our street of non-residential persons parking when match day events are on and when concerts are being played at the Etihad, I would like you to look into parking permits for residents here on Canada Street and New Street, I am very worried that with another large arena this problem will get even worse for us.

We do have families living on these two streets, which when events are on the two streets are packed and all around the post office are filled with visitors to the area, I have contacted highways previously to ask for permits for us living here, but to no avail, not really helpful for our situation.

Another reason that concerns me is litter, we do find that litter is left in the area as well and feel the appropriate measure when these people have all gone is to go outside and pick it up ourselves, therefore litter notices and fines would be an advantage to all us residents who keep our area clean and tidy, we have organised cleaning event days working along with Manchester City Council and the walking wounded office on Canada Street so this information advertised to visitors would be an advantage to us.

I am the Chair Person for the Residents Committee of both streets and try my best to keep the area safe, clean and tidy for both streets, working along side yourselves and listening to people concerns, I am hoping that you do listen to my concerns in this letter and resolve the problem that exist already and not to make this get worse by the building of the new arena, people will park anywhere so they don't have to pay, I have myself in the past had to stand on my door step to politely ask people not to park outside my home as my partner was due home from working with the Armed Forces, this I should not have to do, any other time we do not have any problems it is only when events are on and match days. We do not go out when football is at the Etihad, if we do we are home two hours before a match as people are parking up already, people can not visit us as there is no where to park the car for them, basically we are having to make alternative arrangements on specific calendar dates.

Please I am politely asking for recognition of this letter and that you do look into this situation, and that you look at it with the upmost thought of us as a family who have to live with restrictions already throughout to year.

Look forward to hearing from you soon.

Kind Regards
