

Application No. 125888/FO/2020

Servicing

Please refer also to site layout drawings appended to this application that illustrate the servicing proposals for the Proposed Commercial Development within the Ground floor and basement at Units 1 & 2, 38 King Street West.

Waste:

The Shop will have it's own waste and recycling storage provision within the kitchen and bar areas. This will then be transferred to external waste and recycling storage area within the specified area accessed via Back Bridge Street.

The managers and staff will be responsible for taking the refuse and recycling to the bin storage area and then the closing manager will be responsible for taking these bins out onto the street for collection by the refuse collection service, along Back Bridge Street every morning.

Deliveries:

Deliveries to and from the shop will be taken from Back Bridge Street through the front entrance. As the shop doesn't open to the public until 12:00 prep work will begin at approximately 10:00 therefore all deliveries will be between 10:00-12:00 outside of rush hour traffic.

Collections

Should Ciao Pizzeria decide to start offering a take away ordering system drivers will be told to park or pull up in the lay by on King Street West in a designated bay and walk over to collect the order when it is ready.

This will minimize blockages and waiting on the back streets.
