Hi Emily,

Further to the email below, please find attached additional information which was agreed to be provided to discharge the conditions.

I have provided some updates to the queries below in blue, however, we are still waiting for the confirmation of insurance by Tariq. Once confirmed, I will let you know ASAP.

Many thanks,

Hannah

Hi Emily

Thanks for your note and chat earlier, I have shared with the team and requested additional information – please see my comments in green below.

Kind regards
Laura

Hi Hannah,

We have taken a look at the information submitted on 17th January and the images sent through seem blurred in places so it's not easy to distinguish the setts in detail enough to ensure accuracy. Is this the fact that they are PDF's as we need to ensure that they are much sharper than this? Can you confirm that there are much sharper / clearer images please. If so are you able to submit a copy of these images? The images are blurred through conversion to pdf; I have asked whether better quality can be provided – however, my understanding is that this is simply to act as a record of what was shown / is available electronically from which the relaying will be achieved and on that basis please could you advise whether the information is sufficient. **Please refer to attached document.**

At Thursday's meeting we asked for the one metre grid to be laid over the images of the setts / on the drawings, please submit this. Checking with the team as to status. **As discussed with Tony, RSK will undertake this work and it must be noted that the proposal is that this will be work in progress documenting the setts as they are taken up, and not being taken up to a pre-determined plan. The attached document sets this out.**

To reiterate, please confirm that the insurance outlined in Tariq's email of 9th January is now in place. Requested team to confirm.

We also require a reinstatement strategy detailing how the cobbles will be reinstated and the measures proposed to ensure accurate reinstatement. The proposed strategy is as per Planit's 'Specification for External Works to Courtyards' OTH-PLA-EE-ES-SPE-L-0002 (page 12 onwards) (submitted with the original condition discharge application) with exact details to be agreed once sub-contractor appointed and the final approach be agreed through the hierarchy document submitted in support of the early works package of information (OTH-LLC-XX-XX-RPT-W-0005 as above). I have requested the team to confirm whether any further information is available now and will come back to you. Please confirm this is sufficient to enable the removal works to commence. **The subcontractor has now been appointed as Byrne.**

To reiterate, can you reassure us that there will be a watching brief by the archaeologist for the duration of the works. As confirmed last week, RSK are appointed to undertake the watching brief.

Please let me know if you need to discuss.

Kind Regards,

Emily Booth
