FR Solutions Ltd

Health and Safety Policy

FR Solutions Ltd is at the forefront of fire protection innovation, working closely with our partners in the fire protection industry to provide the following services: Intumscent Coatings, Industrial/Protective Coatings, Site Touch-up, Shot Blasting/ Corrosion Protection, Fire Stopping/ Fire Compartmentalisation, Fire Boarding, Perimeter Slab Fire Protection, Fire Compartment Surveys/Risk Assessment, Testing & Certification and Coatings Inspection/surveys.

It is the company's objective to provide, operate and maintain a workplace environment which offers no or as low as practicably possible health and safety hazard to employees, associates, customers or the general public. The company recognises the importance of integrating Occupational Health & Safety (OHSAS 18001) requirements into its management systems and is committed to establish and maintain compliance with all relevant legislation, regulations, standards and best practice.

Our aims are to achieve:

- The implementation of Risk Assessments so that suitable Safe Systems of Work are planned and implemented.

- A safe working environment, safe entrances and exits to and from the building and its surroundings and the provision of suitable welfare facilities.

- Safe plant, equipment and tools.

- Safe use, storage, handling and transportation of hazardous materials and substances.

- Instruction, training, supervision, information, advice and support in respect of all work activities and in respect of plant and equipment.

- Communication and consultation with all employees, associates and customers by means of Health and Safety meetings where appropriate together with training and advice to customers.

- Continuous improvement in the identification and reduction of workplace health and safety hazards and the setting and monitoring of Safety Objectives.

- Identification of roles and responsibilities, together with the provision of adequate resources, to achieve a high standard of Occupational Health and Safety management.

- Audit and inspections of the OH&S Management system at suitable intervals.

- Management review of the OH&S Management system at intervals no greater than one year. All employees, associates and customers have a personal duty of care to ensure their own safety and that of others by co-operating and complying with polices and procedures set out by the company, not misusing or mistreating equipment provided by the company, by using Personal Protective Equipment provided and by notifying hazards immediately to a member of staff. The Managing Director is responsible for and commits to Health and Safety polices which are aimed at delivering satisfaction to customers, shareholders and employees, members and associates and the community.
