Construction (Design and Management) Regulations 2015

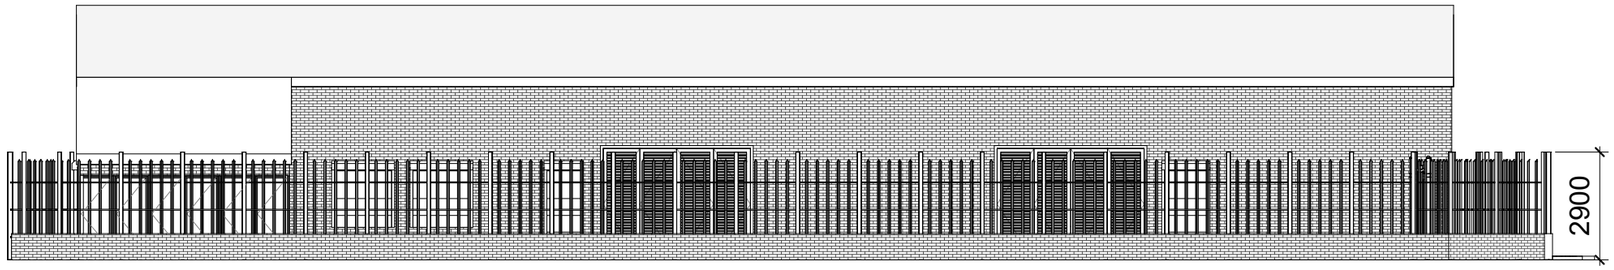

Designer Considerations

LDM Surveyors' duty on this project is that of "Designer" as defined by Regulation 5,
and have avoided foreseeable risks to those involved in the construction and future use of the
structure and in so doing eliminated hazards (as far as is reasonably practical, taking account of
other design considerations) and reduced risks associated with those hazards.
The Designer has provided adequate information about any significant risks associated with the
design to enable the client and the work is/others in order to improve the way in which risks are
designed and controlled.
The associated risks are restricted to site or project specific risks and as such are not considered
as a complete and final list of all hazards that may exist
