Hi Chris,

My client has confirmed that all BT InLink units have an auto dim function inbuilt, in which the light from the screens will not exceed 600 cd/m2 during the hours of darkness.

It is trusted that this is acceptable to the EHO / Council and a note can be put on each file that confirms this.

Kind Regards

CHRIS TAYLOR

Subject: Fwd: InLink applicaitons

Hi Ginny,

Please see EHO response below - one query about light adjustments.

I would assume this query will come back for all the applications pending consideration, so can you please update the relevant document and forward to myself and I'll get it uploaded to all the applications.

Thanks,
