Subject: FW: NLM - Vehicle Access - Facade Opening

Jen, Paul,

Please see below from PRP, forming the opening would mean the removal of **0.00565%** of the overall brickwork.

Hope this helps, this is the last of the information I was looking to submit in relation to the opening, if there is anything else I can send please let me know as I'd like to make the submission when you have reviewed the information.

Thanks

Adam

Hi Adam.

The amount of existing brickwork (along with stone cills and string courses etc.) measures approximately **2,156.103m²**
The extent of the opening you are going to be creating is **34.186m² (0.0158%)** but the amount of brickwork is only **12.183m²** which amounts to **(0.00565%).**

Sarah

Sarah,

As discussed, this is the section of the Radium Street elevation that we've asked Jen & Paul @ MCC if we can remove to form our temporary opening in the façade. They have asked that we calculate how much brickwork is going to be removed as a percentage of the overall brickwork on the scheme, if there is an easy way for you to do it that would be much appreciated, otherwise I'll just start scaling it off drawings if it's a lot of work for you. Let me know

Thanks

Adam
