Subject: Re: 1903 - NLM - Waulk Mill Coordination - 3 Windows

Adam

I have no objection to this in principle subject to seeing the detail. Also, Paul is not in at the moment to confirm.

It may be worth including this change on the planning application you wish to submit.

Thanks

Jen

Hi Jen, Paul,

We have 3no windows in the Waulk Mill car park which are currently being used as a type of retaining wall for the car park. Before we remove all of the temporary blockwork in the window openings, we need to come up with a solution which is different to that currently drawn that keeps this retaining function.

These 3 opening were due to have windows installed with backed glass so you couldn't see through them with a blockwork wall behind the window as its down to be a comms room on the inside.

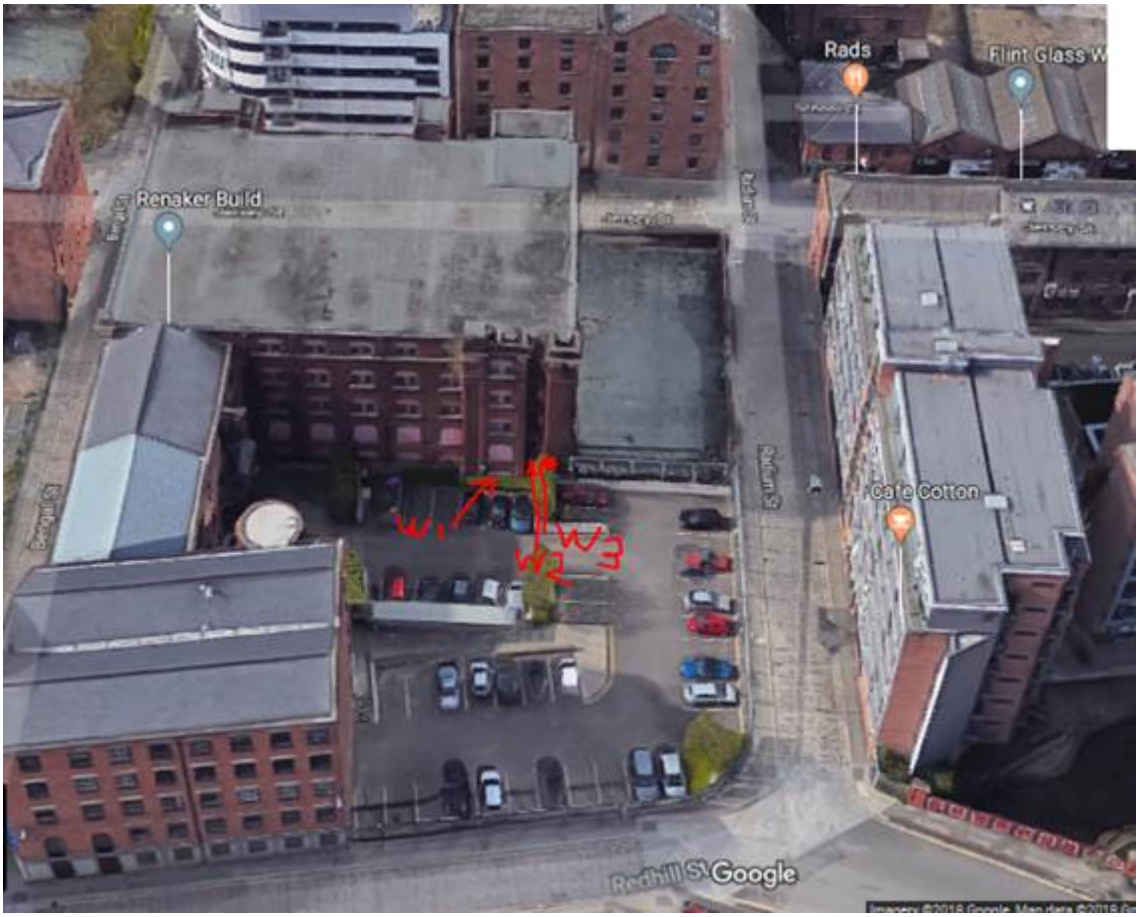

I've highlighted this problem on the attachment and also highlighted the 3 windows on the elevation and plan drawing below.

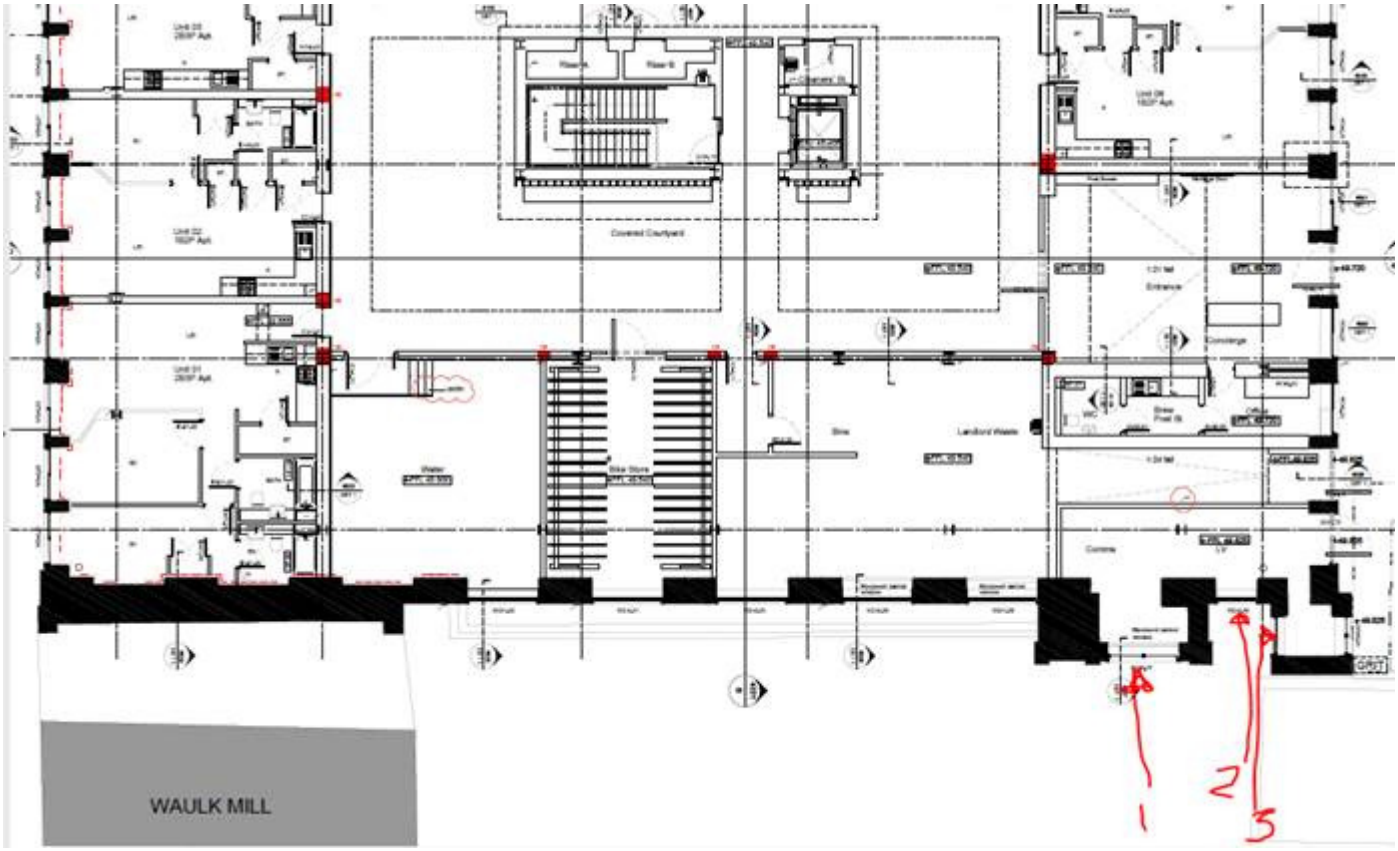

I've discussed solutions with PRP who are happy in this area to brick up the openings as long your happy and that the brick is left 25mm back from the face of the elevation to highlight that it is an opening and its current arch. These windows aren't the most visible from anywhere due to the tower recess, sorry for the poor mark-up below but it should highlight the issue and the location.

I've also attached a sketch of what we're proposing, before we go any further i.e. present a formal change to MCC could you provide comments or an approval in principal to the idea?

Thanks

Adam
