Subject: RE: MIF - Mayfield
To: Angela Leckie <a.leckie@manchester.gov.uk>

Hi Angela

Further to our correspondence yesterday, I have now spoken to Manchester International Festival. They have removed one piece of Asbestos by certified contractor which was located within the areas they intend to occupy. Please see attached the removal certificate to confirm this. All other areas have been isolated and are not accessible to anyone, including both staff and patrons.

I have asked Faithful and Gould and Burohappold, who are advising U+I more broadly on the Mayfield Depot to understand if any other works have been undertaken.

This, combined with the information previously submitted in terms of the risk assessment and asbestos remediation and protection measures (reattached), should be sufficient to determine that risks to human health associated with asbestos as a result of the temporary change of use are mitigated.

I will let you know if BH and F+G have undertaken any further remediation works but please let me know if you need anything further.

Kind regards

Mike
