Hi Sue,

I hope you're well?

Further to our chat earlier this week, please see attached revised proposed site plan PL02B which shows the additional camera, which was missing from the previous drawing. As you will see, there are 9 cameras proposed and the missing camera is a wall-mounted unit which is facing toward the boundary fencing. I trust this is clear, but please let me know if there are any other issues with this drawing.

To answer the query from your previous email, all proposed lighting / camera towers are to be black powder-coated.

With regard the requested extension of time, please accept this email as our agreement to this.

I trust the above / attached is acceptable, but please do not hesitate to contact me should you require anything further in the meantime.

Best regards,

Liam A Kelly *BSc (Hons)*

Dear Liam ,

Having visited the site yesterday there are a couple of matters which I would seek to clarify.

1. The proposed lanterns , columns and CCTV cameras should powder coated and not be a galvanised finish,Please can you confirm the colouration of the lanterns , columns and CCTV cameras , as some of the submitted documentation refers to black powder coated and other information refers to light grey colouration.

2. You have referred to lighting specifications J4LED4050CFP30-S7A5 and J4LED4050CFP30-F0 , but I cannot find these references in the Highway Diamond Elite catalogue . Please can you confirm that the lantern would be a Mid Highway Diamond elite, so that the visual design is confirmed.

3. The submitted Grantfen document refers to the installation of 8no. external bullet cameras, and 1 external PTZ camera. However m the submitted plan only identifies 6 camera positions . Please can you confirm the which camera type is to be sited in each location and confirm the total number of cameras to be installlled

Given the timescales relating to this application I would be grateful if you could respond as soon as you are able.

Kind regards

Sue Wills
