Subject: RE: Siemens Campus - D3 Building Amends

Dear Ellen,
I am fine, thank you. Hope you are OK too.
I have reviewed the drawings you sent earlier. Based on these drawings, I don't expect the plant screens to change any wind conditions predicted in my previous wind assessment. Hence, there is no need for further wind assessment. I can confirm you that the proposed plant screens would not change the conclusion of my wind assessment on Siemens Campus.
Thank you

Regards,
Nada

Subject: Siemens Campus - D3 Building Amends

Hi Nada,

Hope you are well.

We are currently preparing an application for Minor Material Amendments to the D3 planning consent on the Siemens Campus (Phase 1). As the wind assessment was included within the EIA for the original application I'd be grateful if you could review the attached revised elevations and confirm if any further wind testing would be required. If not, could you please confirm by return email that the revised proposals would not impact on the conclusions of the ES.

The main change that might impact the wind assessment is the extension of the plant screen on the building (see attached approved and revised plans). I have also attached the marked up plans for further details on the proposed amendments.

Please do give me a call if you would like to discuss.

Kind regards,
Ellen
