LANG+FULTON

Wheelie Bin Stores

t: 0131 441 1255 sales@langandfulton.co.uk www.langandfulton.co.uk

With over 20 years experience, Lang+Fulton is a leading supplier of compounds and enclosures for wheelie bins throughout the UK.

Recent figures indicate that the quantity of UK domestic waste is increasing at a rate of about 3% per year. Local Authorities are addressing the problem with greater provision of wheelie bins and have issued the following guidelines for storage in external enclosures:

- durable construction
- well ventilated
- secure

Lang+Fulton bin stores have a solid steel construction to withstand the wear and tear of regular bin collection.

With clean, simple lines our bin stores provide visual screening and security, as well as ventilation and natural daylight.

In addition to the Europa range of standard designs, we specialise in the design and supply of bespoke installations.

All of our bin stores are made from a practical system of modular steel louvred panels and doors with or without roofing. They are supplied with all accessories and a full set of drawings for easy installation.

Options:

- Panels from the Italia or Delta ranges of steel louvres or open mesh grating
- roofing for additional security and to deter birds, made from single skin profiled steel with Plastisol coloured finish
- rain-water gutters
- bump rails
- locking - padlock and sliding latch
- DDA Compliancy

Finishing:

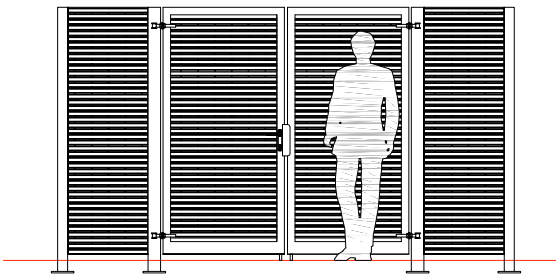

All bin stores are supplied in a tough hot-dip galvanized finish with an optional polyester powder coating to BS 1722 - Part 16 in any RAL or BS colour for a long lasting, low maintenance finish.

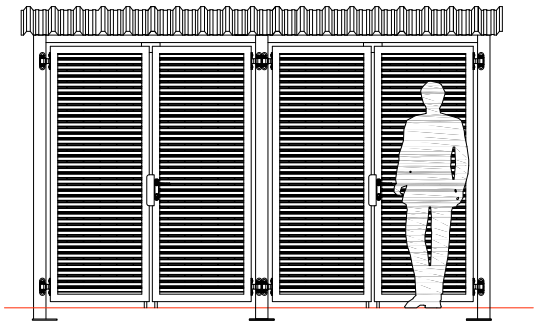

The Europa Bin Store

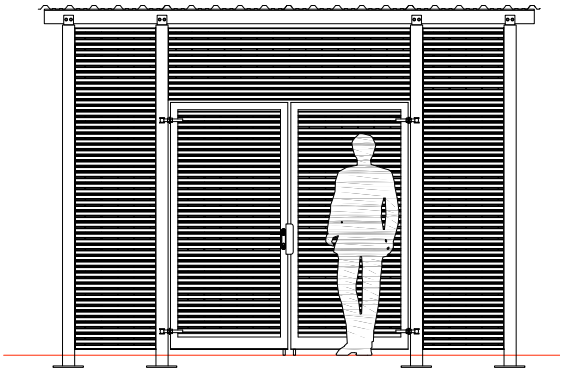

Our experience in the supply of bespoke bin stores has allowed us to develop and refine the Europa range of standard designs.

Type A - no roof

Type B - forward sloping roof

Type C - backward sloping roof

Europa bin stores are available with or without roofing in three different sizes to suit either 2, 4 or 6 wheeled 1100 litre Eurobins.

The Europa range is made using panels of Italia steel louvred grating. Italia-80, which provides 80% visual screening, is supplied as standard but Italia-100 can be specified if 100% visual screening is required.

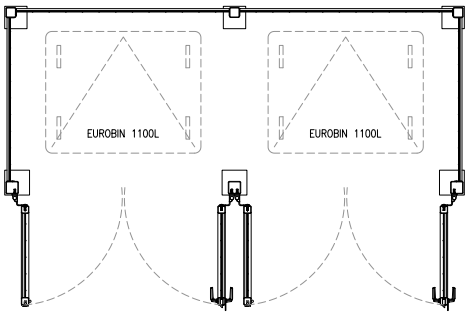

A complete package includes: RHS posts, SHS corner posts fitted with base plates, doors with euro-profile cylinder, Locincox locks.

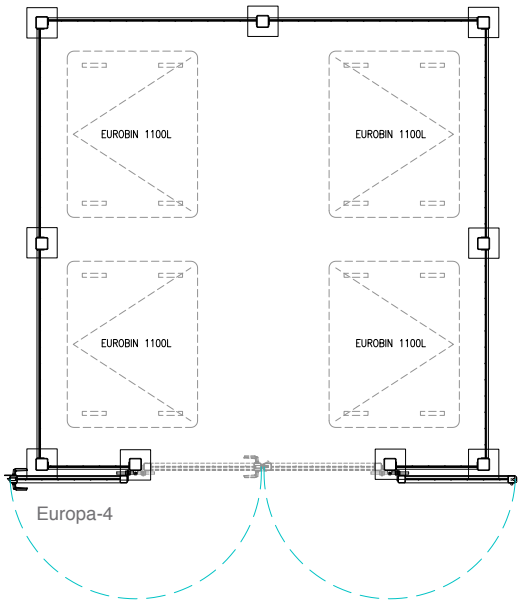

Italia-80

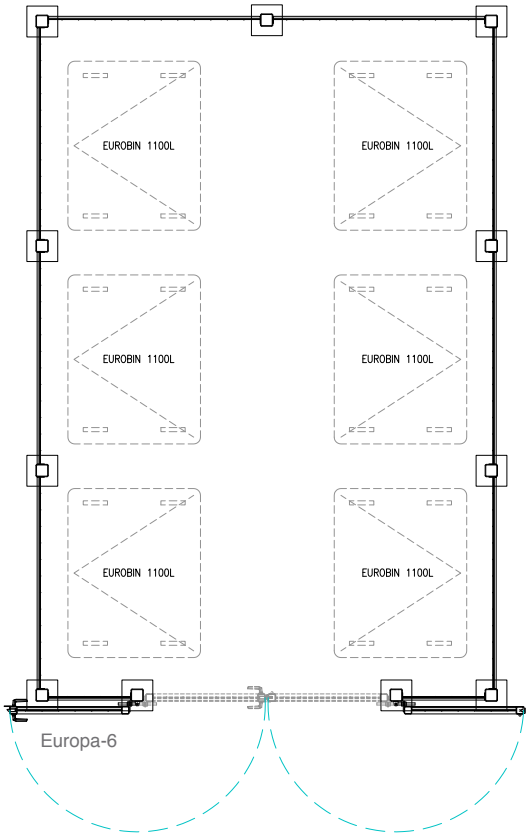

Italia-100

Europa-2

Europa-4

Europa-6

Capacity (bins)	Width (mm)	Depth (mm)
2	3700	1500
4	3750	3750
6	3750	5670
Height: 2000mm for Type A
