University of Manchester: John Owens: Works to Coupland Street Lightwell

Photographs: April 2017

The Coupland Street lightwell looking west prior to the works commencing.

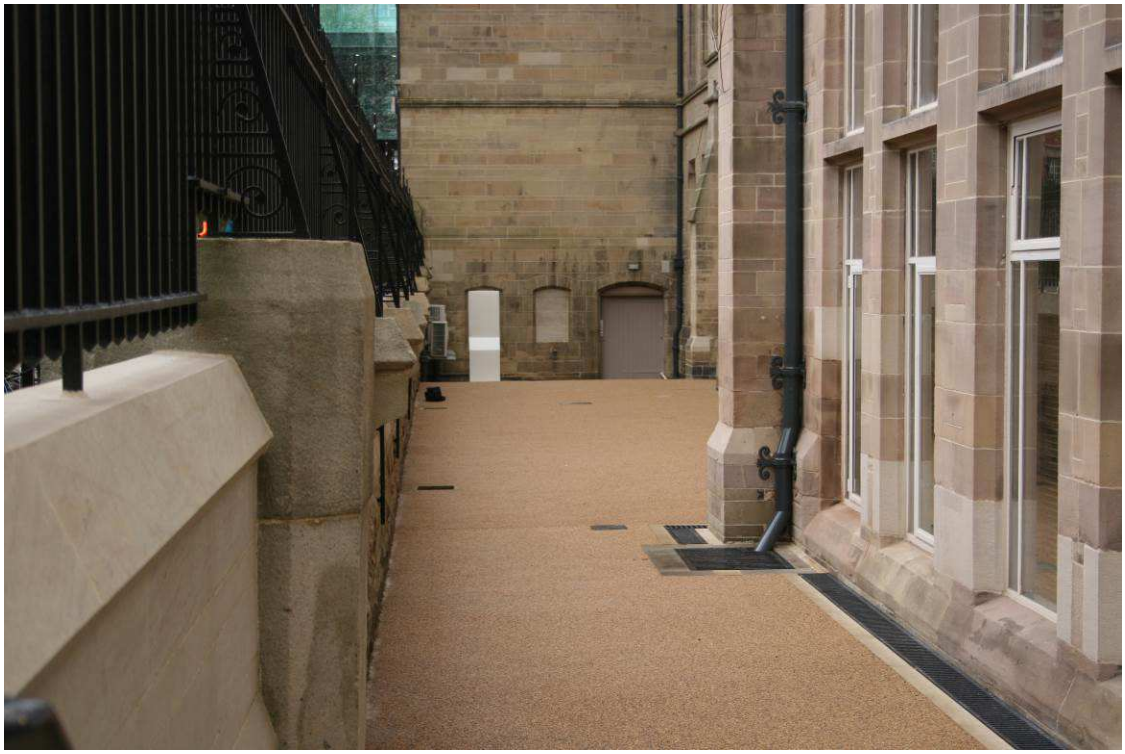

The lighwell looking west with the works approaching completion.

Photographs: April 2017

The lightwell looking east prior to removal of the ‘glass box’.

The lightwell looking east following removal of the structure, and resurfacing.

Photographs: April 2017

The eastern area of the lightwell with services emerging from the tunnel and concrete bases.

Corresponding view following the works: Cables contained in duct, condensers wall mounted.

Photographs: April 2017

Looking east towards the Beyer plant room: Surface mounted condensers, cabling on wall.

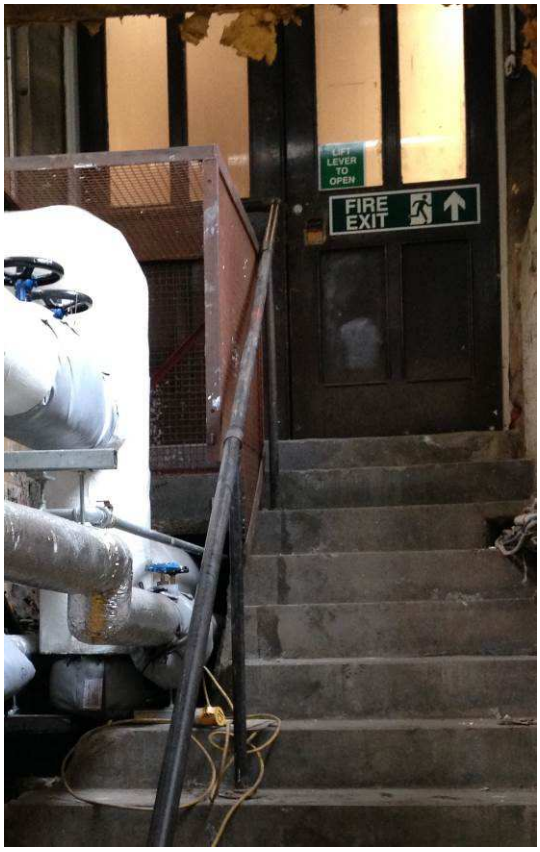

Corresponding view: Cabling in duct and condensers mounted on Coupland Street wall.

Photographs: April 2017

Door opening obscured by the ‘glass box’, and with the structure removed and stone repaired.

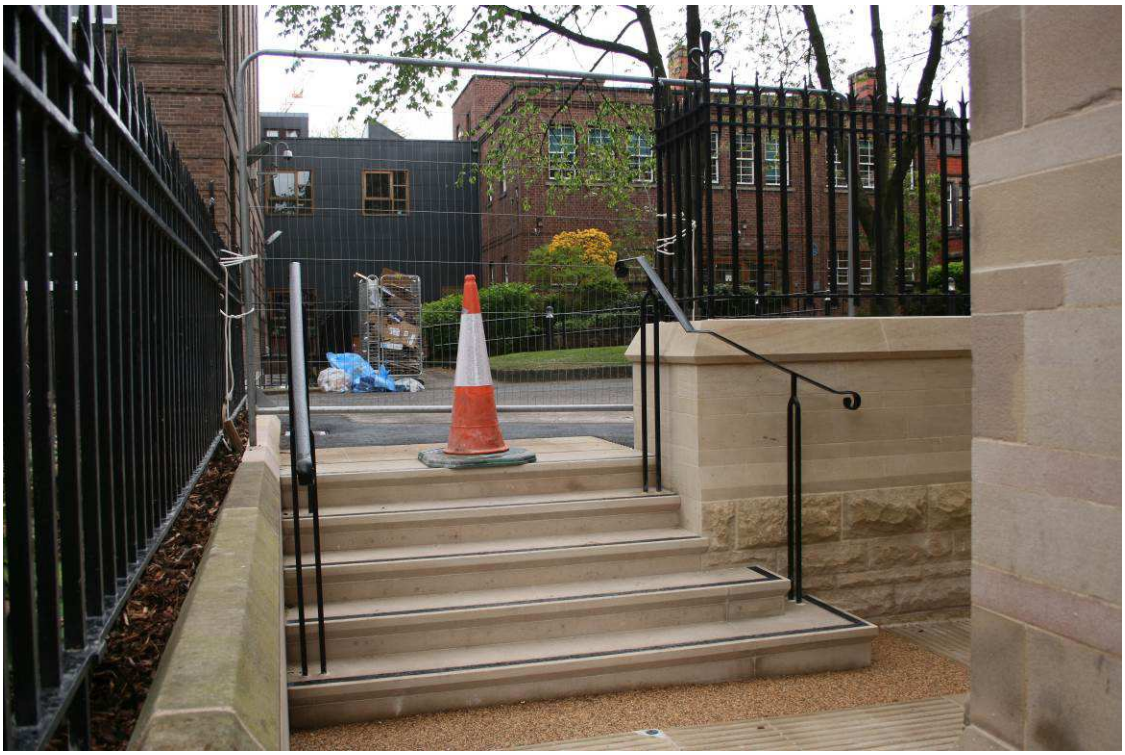

Steps leading from the tunnel to the doors, and the restored doors viewed from John Owens.

Photographs: April 2017

Steps and ramp from Coupland Street: Wall prohibits access from Botany gable path.

New steps from Coupland Street, with ramp and wall removed giving ‘level’ access to lightwell.

Photographs: April 2017

View across Coupland Street looking south-east: Lighting to finish and doors still boarded.

Similar view looking south-west.
