ABOUT ASGARD

Asgard providing quality metal storage >

Asgard Secure Steel Storage is a division of Flexiform Business Furniture Limited, a leading supplier of steel storage systems for over 30 years. Asgard can draw on a wealth of metal fabrication experience and has a long history of engineering and manufacturing excellence.

Asgard produce metal sheds and garden security storage of the highest quality.

Flexiform and Asgard work hand in hand supplying some of the largest government contracts throughout the UK. As a business we are ISO 14001 and 9001 accredited with prestigious, established clients such as the Parliamentary Works, the West Yorkshire Police Force and many local authorities.

With an unrivalled reputation for quality and innovation you can be sure of our long term commitment to supplying quality products.

ABOUT ASGARD

Why metal, why not wood?

WHY METAL AND NOT WOOD?

One of the most common questions we get asked is "why should I buy metal when it will just rust? What are the advantages of metal units?

RUST RESISTANT

Our metal sheds are different from many other units on the market. All Asgard sheds are made from thick, galvanised (weatherproof) steel.

We then coat our galvanised metal in a polyester powder coat paint. This combination of processes makes the steel not only weatherproof but very tough and durable.

Asgard use only zinc coated screws for assembling our sheds. A zinc coating makes the screw heads rust resistant.

WEIGHT

Good quality metal sheds are heavy. Our sheds are made from thick steel and include an integral metal base, so an Asgard shed is very heavy! With this weight comes quality and security. You can be sure that no burglars can easily lift the roof off an Asgard unit or kick in the doors or even just push the shed over. With Asgard units you can choose to fix your unit to the floor using our (included) fixing kits, then you will have the maximum security for your tools and equipment.

On average our units are 5 times heavier than the equivalent sized product from other companies*.

SECURITY

A metal unit has a metal roof and metal doors. A wooden shed is weak in comparison and can be simply "kicked" in. An Asgard unit has integral stiffeners, internal shoot bolts (depending on model) double folded joints, hidden fixings, integral all metal floors, pick resistant locks and ground anchor points. Add to this (on selected models) our internal roof clips and you really have the maximum security possible.

MAINTENANCE

Other than a periodic wipe down and oiling the hinges, Asgard units are virtually maintenance free. One of the most common questions we get asked is "why should I buy metal when it will just rust? What are the advantages of metal units??

No annual reflecting of the roof.
No repainting.
No rotten panels to replace.
No doors blown off in the wind.
No leaks.

WARRANTY

All Asgard storage is covered by a 10 year anti perforation warranty, giving you the confidence that your Asgard unit will provide you with many years of secure storage.

ASGARD FEATURES

Key features and benefits of Asgard products

1. GALVANISED STEEL
Every Asgard product is made from tough, galvanised steel. Making Asgard sheds secure and weatherproof.

2. LOW MAINTENANCE
Unlike wooden sheds, metal sheds require very little maintenance – giving you years of trouble free storage.

3. 10 YEAR WARRANTY
All Asgard sheds come with a 10 year warranty as standard.

4. NO EXPOSED SCREWS
Asgard storage is built inside out - there are no exposed fixings or sharp edges making Asgard sheds both secure and safe.

5. EASY ASSEMBLY
Asgard sheds come with simple step by step instructions for easy assembly. An installation service is also available.

6. PICK AND DRILL RESISTANT LOCKS
Fitted to most Asgard storage units to provide the best possible security.

7. UNIQUE SHED VENTILATION
A unique shed ventilation system is in every Asgard shed helping to maintain air flow inside and minimise condensation.

8. ACCESSORIES
Asgard units are pre drilled for our accessory packs including shelving and hooks.

9. INTEGRAL METAL FLOOR
Metal sheds from Asgard are the ONLY metal sheds with an integral metal floor. This floor adds even more security to the unit – you can also bolt them to the ground.

10. APPROVED STORAGE
Asgard storage is Locksmiths approved, Insurance approved and industry approved!

11. MADE IN THE UK
Every Asgard is designed and made right here in the UK and delivered by our own staff.

SPACE SAVING BIKE LOCKER

An Asgard bike locker is the perfect way to lock away your "best" bike, keeping it safe and dry. Designed as a space saving storage unit, a single bike locker is great if you are short of space outside and need to keep your bike locked up and out of sight. The single bike locker is accessed from the end so the width of the unit is kept to a minimum, making it ideal for down the side of a house or flat or anywhere where space is short.

Inside the locker is a guide rail to hold your bike upright, this can also be used as a 2nd locking point for increased security. To top it off, this bike locker can be bolted to a concrete base, meaning no one can attempt to lift or carry the (15 stone) bike locker away. A set of hooks are also included so you can store your helmet or other cycling accessories together with your bike.

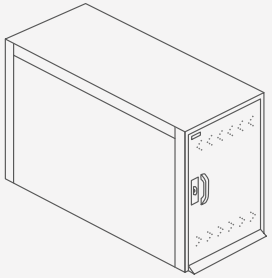

"I would recommend to anybody for bike storage or anything of any value!"

LL

"My bike storage arrived on time and took no time to install"

THE BRITISH ASSESSMENT BUREAU ISO14001

SPACE SAVING BIKE STORAGE

We like to store bikes! As reports of bike theft increase on a weekly basis, we are constantly looking for ways to protect your bikes. This has given birth to the Asgard vertical bike locker. This is great as a space saving bike store, by storing the bike on the back wheel you use less floor space, so freeing up valuable garage or garden space.

Inside this thick, weatherproof, all steel unit is an easy access guide ramp and a wheel retaining clamp. Simply open the heavy duty, fully galvanised door. Then lift and push the bike into the wide guide rail. Your front wheel lifts over the wheel retaining hook, and then drops into place clamping the bike wheel into place. It's that simple, your bike is now stored!

Bike Storage

*Twin Bike Locker- 2 Bikes***

STORE & SECURE TWO BIKES

The 'Twin' bike storage unit is the perfect way of storing two bikes securely in a discreet manner. Designed as a space saving storage unit, the twin bike store is ideal for areas where space is restricted but bike security is important. Unlike other bike stores the twin bike locker is accessed from the end so the width of the unit is kept to a minimum - ideal for use down the side of a house or flat.

The Twin Bike Locker is suitable for adult or childrens bikes and includes 2 kit hooks for storing your bag or helmets with your bike. The unit is made from tough galvanised (weather proof) steel featuring a tough 3-point locking system and a pick resistant lock. A stylish vented front keeps condensation to a minimum.

Bike Storage

*Double Ended Bike Locker- 2 Bikes***

THE BRITISH ASSESSMENT BUREAU
ISO14001

a to b

STORE & SECURE TWO BIKES

Our double ended bike storage unit is the perfect way of storing two bikes totally separately of each other in a discreet and secure manner within the same unit. Designed as a space saving storage unit, the double ended cycle store is ideal for areas where space is restricted but bike security is important. Unlike other bike stores this bike locker is accessed from both ends so the size of the unit is kept to a minimum - ideal for use down the side of a house or flat.

The two independently locking doors (3 point, pick resistant locks on each door), a tough steel internal division AND internal locking points ensures that two bikes can be secured totally independently of each other inside the same unit. Perfect for communal areas or shared accommodation.

DOUBLE YOUR HOUSE FOR HALF THE MONEY

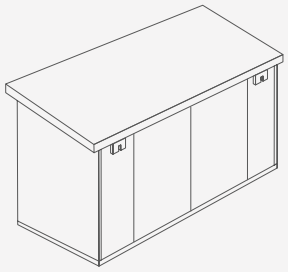

THE BRITISH ASSESSMENT BUREAU ISO14001

STORE & SECURE 4 BIKES

The Access Plus is the perfect solution for your bike storage needs and can store up to 4 bikes*. It has been engineered to securely store bikes of all sizes, including bikes featuring the larger 29 inch wheels (first of its kind). Manufactured from heavy gauge galvanised steel the Access Plus offers both security and reliability. As well as the thick weatherproof steel panels, the Access Plus has an integral metal base for maximum reinforcement and rigidity. Featuring double front door access, as well as a reinforced easy lift lid (gas lift), the Access Plus makes it easy for you to get your bike in and out whilst maintaining high security for your valuable possessions.

29 inch bikes are becoming a commonplace amongst cyclists, however security and storage is now ready for the 29ers. With the Access Plus being larger you can now safely store your 29ers and have room to spare. With the ability to accommodate up to 4 bikes* the Access Plus eliminates the hassle and stress of cramming your bikes into a tiny storage space. The Access Plus features a twin shrouded locking system and is fitted with a steel dead bolt locking bar.

HIGH SECURITY BIKE STORAGE FOR 8 BIKES

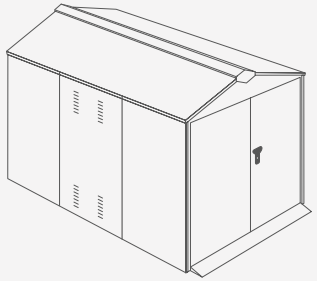

This bike shed is our biggest bike storage unit to date. Designed to offer secure storage for your most valuable bikes and cycling accessories, this bike shed is made from our tough, galvanised (weatherproof) steel panels and is packed with lots of features to give you the ultimate in bike storage.

Including: an electric socket mounting plate, clothing hooks, integral metal floor, a wooden subfloor and a useful maintenance equipment shelf. This is a complete cycle maintenance and storage unit.

This extra-large storage shed is perfect for keeping all of your bikes (stores up to 8 bikes*) and equipment together and with hooks, a shelf and a protective wooden floor included, you can fill this cycle maintenance shed from ceiling to floor. The extra space inside can be used to carry out essential cycle maintenance, keeping you and your prized bikes sheltered from the bad weather.

"The 8 bike shed is great! We use it at the scout hut we keep bikes, sports equipment in – you name it, its in there"

P.Kragon

UNIT DIMENSIONS
Height: 6ft 7" (2032mm)
Width: 5ft (1524mm)
Depth: 10ft 9" (3317mm)
Weight: 334Kg (52.5 stone)

walk in or ride in your bikes into the unit.

TOUGH, WELDED HINGES -
prevent forced entry.

SUPER STRONG REINFORCED PANELS -
heavy duty storage.

THE BIKE MAINTENANCE AND STORAGE PACK :
a heavy duty ramp, integral metal base, OSB wooden sub flooring, hooks, shelves.

"An Asgard shed is one of the heaviest and best quality on the market and so their self weight and goods stored within them often mean that anchoring the base is not required for sheltered locations".

John - The secrets of shed building.com

"To repeat, I thought the quality of your product is excellent. The shed it replaced was a cheapo from B&Q or similar, it was not nearly as good quality, much thinner material, loads more parts, much harder to assemble, never looked too good. The other larger shed (still in use) is better quality, still not nearly as solidas Asgard, but took us days to put together :-(. When it starts falling to bits, we'll replace it with an (Asgard) Trojan".

"Asgard sheds allowed us to secure our extensive range of sports equipment in an easy to use annex which has helped both staff and students."

"Your customer service has been exemplary. Thank you"

"The strength and security of the unit is evident when you assemble it and my bike store has been secure and weatherproof over the winter months. Highly recommended."

"Big thank you! My bike shed is great".

"Glad I had my Asgard with all this snow. Kept my bike nice and dry over Christmas"

"Good installation service. Very friendly"

"We are happy with the quality of the Asgard sheds we now have on site. They were delivered and erected swiftly and professionally."

Asgard Feedback

Reviews and comments from Customers and Magazines

Singletrack | Cycling Plus | Descent World | Motor Cycle Monthly | Cycling Weekly | Ealing Cycling News

REVIEWING THE CYCLE STORAGE X 8

"The level of detail included in the build is impressive and it comes with everything you need, though it must be sited on either concrete foundation or solid patio, The lock on the door is a triple point contact system using Yale-style cylinder keys. You can also buy a wireless infa-red alarm from Asgard, and if anyone were to try and break in, the fact is essentially a huge steel drum means they at least won't be able to do it in silence.

Overall if you are a typical domestic male you will be in shed heaven with the Asgard. The level of security it offers is second only to a well-padlocked shipping container."

REVIEWING THE ADDITION BIKE SHED

Cycling Plus magazine rated our store 9/10 and wrote,

"The best bike storage we've seen by a long way. Storage is always a problem for cyclists. Our bikes are often the second most valuable items we own after the car – sometimes they're worth a lot more – so we tend to bring them into the house. But bikes just aren't designed for leaning up in hallways or stuffing under beds. So if you're fed up tripping over your bike around the house and want to keep it and all the other mucky cleaning, tweaking and riding paraphernalia outside the house where it won't get nicked – one of Asgard's bike stores could be what you're after."

REVIEWING THE ACCESS BIKE STORAGE

"Usability of the unit is top notch. Access is gained through large double front doors aswell as the whole roof of the unit lifting up making getting bikes in and out a breeze. The inside itself is particularly spacious, initial concerns that 4 bikes was a little optimistic proved unfounded with 4 bikes fitting with ease along with my strimmer and tool boxes!..."

"For those of you used to having your bikes inside your house will of course be concerned about protection from the elements. No concerns here, all access points are well sheilded from the elements and the galvanised steel construction should give great protection over time."

REVIEWING THE CENTURION

It's big, expensive and tough - but it can also get bigger with a series of extension packs. Ideal if you're a collector or someone with a large tourer. It's the only bike shed that is UK locksmith approved and - better still - the size and weight means that if you have your bike stored in this overnight, your insurers class it as 'garaged'.

REVIEWING THE ANNEXE BIKE STORAGE

'We were really impressed with the Asgard Annexe we featured in the February 24 issue with its room for up to three bikes. But knowing you lot as well as we do, we also know that most will own more than three bikes (don't worry your secret's safe with us!). Which got us to thinking about what we would do if we wanted to store more. Enter the Asgard storage garage...

With a floor area measuring five foot by nine, it'll hold quite a few more than three bikes. In fact it's almost high enough to stand in and can be fitted with a hook rail and shelf so there are several options when it comes to storing bike stuff in it.'

REVIEING THE ADDITION BIKE SHED

"First impressions are good, the unit really does fit 3 bikes as the photographs show the shelving unit makes a big difference to store the usual stuff. The unit feels rock solid and very secure and the lock should be enough to deter most people. The model up allows you to add your own paddlock. The whole thing can be secured further by using ground bolts and there are optional ground anchors too..."

"I prefer this over the Trimetal model, the shelving and hooks are a nice touch and not being top opening means you can store things on top of it"
