Our Ref AM Potato B3&4

14th April 2015

Lend Lease
Clarenden House
76/90 High Street
Solihull
B91 3TA

For the attention of Mr Stephen Woodward

Dear Sirs

Re: Potato Wharf Manchester Blocks 3&4 Pre Construction Survey

Further to our recent site survey we report as follows.

We started the tests behind the completed apartments on Friday 10th April 2015. "Loxam" provided the powered access and the signal tests were carried out by Mr Michael Proctor from TVA Installations. Mr Proctor has worked for TVA since November 2005.

The tests were carried out using a ROVER examiner, spectrum analyser and a UHF "yagi" aerial array.

We managed to obtain thirteen test results during the course of the day.

The tests that we carried out have built up a general picture of TV reception in the area.

As previously mentioned, an elevated railway track runs behind the development which presents the main obstacle to overcome, in order to obtain reception. With the exception of Linby Street, all signals and their quality were good.

Previous tests have identified Linby Street as having weaker signals and marginal quality. As the proposed development height does not exceed the height of the present blocks on the site, I can conclude based on the information obtained, that the development should not had an impact on the TV reception in this area

We trust that this meets with your approval

Yours sincerely
For TVA Installations (Stockport) Ltd

Alan Murthwaite
Contracts Manager
