William Hulme's Grammar School

SPECIFICATION

SECTION AA

MATERIALS

DISPLAY
The image is printed on a high-definition PVC-vinyl display which is stretched taught around a rotating tension frame to provide crisper and sharper images than the traditional 'paper and paste' method. The flexible PVC is satin white and 0.375mm thick.

NAME PLATE
A JCDecaux band nameplate features on all our street furniture and large format displays. A transparent royal blue casing is lit by LED lighting.

OUTER SHELL
The display screens will be housed within a brushed steel effect slimline unit and mounted on a single leg and cross-bar of the same material.

ILLUMINATION

Illumintaion is provided by an internal LED lighting system which is housed within the box behind the screen. LED dot arrays fitted on 1600mm x 800mm LED cabinets in accordance with manufacturers details.
- Effective life of 50,000 hours
- Low energy, huge electricity cost savings
- Easy disposal
- Low light wastage

INSTALLATION

FOUNDATIONS
35N/mm² concrete to a depth of 1.5m is required to secure the legs and introduce the electrical connection.

HARDSTANDING
Hardstanding will be provided by the existing surface of the site to allow for ladders to be safely positioned when changing the vinyl display (fortnightly).
