27th February 2008

Dear Mr Mitchell

RE: Nokia 35 Market Street, Manchester, M4 3AQ.

The application is to install a new Aluminium top & bottom frame shopfront with a central entrance into an existing unit for a new retailer (Nokia) with mitred glazing joints to front of lobby and frameless patch fixings to rear of lobby. The entrance will be formed of a shallow tiled slope in the lobby with an aluminium framed entrance mat inside the pair of doors, the doors are fitted with floor mounted springs and tubular door handles for ease of use.

Yours sincerely

Graham Richards
