VICTORIA BATHS, RESTORATION PHASE ONE - RAMP 086320 & 086342 / PPG 15 STATEMENT

Thanks for getting back to me. Sorry for the delay. I had thought I'd sent this before. It is along the same lines as the PPG15 used for the ramp that ran at the side of the building.

PPG 15 Statement

The provision of a disabled access ramp at Victoria Baths has been considered within the context of the listed building. In general the ramps presence has been minimized with the use of transparent materials and careful positioning of the landings. The following are principals of the ramps design:

-The ramp is of temporary construction to limit its impact on the listed building.
-The ramp will not be mechanically fixed to the building. All connections will be no permanent.
- The ramp is to be designed to ensure a minimum visual disruption to the front elevation of the building.
- The ramp is laid out to prevent it traveling across the front of the building while still complying with the DDA requirements for the travel and fall for an access ramp.
