CROSTON CONSERVATORIES

85 Bison Place

Moss Side Ind Estate

Leyland

PR26 7QR

Ref: Flood risk assessment 092983/FH/2010

Further to your letter we received with reference to the above application I can confirm that the proposed floor level will remain 150mm higher than the existing rear garden level, and will be at the same level as the existing house. The conservatory will be constructed out of cavity wall construction with a damp proof course at floor level to stop any rising damp. The floor will be 100mm concrete with a damp proof membrane. Any plug sockets or electrics will be positioned a minimum of 450mm above the new floor level. All opening will be sealed fully at all intersections.

Yours Faithfully

J Berry
