Lancashire And Furness

Published 1848

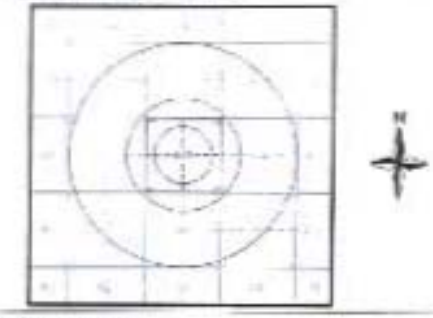

Source map scale - 1:10,560

The historical maps shown were reproduced from maps [redacted] at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The publisher date given therefore is often several years later than the surveyed date. Before 1935, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in adjoining areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unrevised - with old military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Lancashire And Furness

Published 1892 - 1893

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the [illegible] for England, Wales and Scotland in the 1940's. In order the 1:2,500 scale was selected for mapping urban areas and by 1960 it covered the whole of what were considered to be the industrial parts of United Britain. The published date given below is often some years later than the surveyed date. Before 1930, all OS maps were based on the Cassini Projection and independent surveys of a single county or group of counties, giving rise to significant inaccuracies in national grid.

Lancashire And Furness

Published 1908

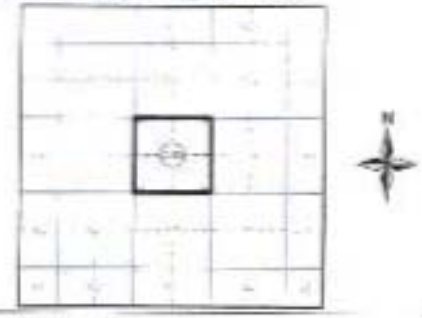

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1890 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1909, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, using the appropriate reconnaissance in outlying areas.

Large-Scale National Grid Data

Published 1992

Source map scale - 1:1,250

Large Scale National Grid Data is provided OS data (Ordnance Survey Survey of Information on Microfilm) in 1992, and continues to be produced until 1995. These maps were the forerunners of digital mapping and so provide detailed information on features and roads, but fail to show later topographic features such as motorways. These maps were produced in both 1:2,500 and 1:1,250 scales.

10K Raster Mapping

Published 2007

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landmark which replaced the old 1:10,000 maps (originally published in 1970). The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information also includes county, unitary authority, district, civil parish and constituency.
