CONTENTS

INTRODUCTION 13-1
The Interaction of the Foregoing 13-1

INTRODUCTION

13.1 All of the reasonably predictable significant impacts of the proposed development and the measures proposed to mitigate them have been outlined in this ES. However, for any development with the potential for significant environmental impact there is also the potential for interaction amongst these impacts. The result of these interactions may either exacerbate the magnitude of the impact or ameliorate it. The interaction of impacts on the surrounding environment needs to be addressed as part of the Environmental Impact Assessment process.

13.2 This Environmental Statement was edited and collated by SLR Consulting on behalf of GTE as an integrated document, rather than a collection of separate reports. The impacts that arise as a result of the interaction between several aspects of the development have therefore been addressed in the main body of each ES section.

The Interaction of the Foregoing

13.3 The interaction between the various sections of the ES has been covered within Sections 4 – 12 of the ES. These interactions are summarised in Table 13-1 overleaf:

Table 13-1
Impacts Interaction and Interrelationships Matrix

	Flora and Fauna	Soil and Geology	Hydrology and Hydrogeology	Air Quality	Noise	Landscape and Visual	Traffic	Cultural Heritage	Socio Economics
Flora and Fauna									
Soils and Geology									
Hydrology and Hydrogeology									
Air Quality									
Noise									
Landscape and Visual									
Traffic and Transportation									
Cultural Heritage									
Socio Economics
