Waste Management Strategy

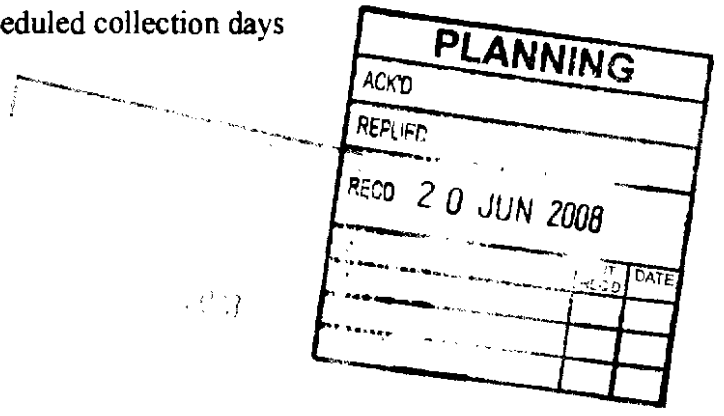

17a Rainforth Street Longsight Manchester M3 ORP

Following discussions with similar sized take aways within the area and the owner of the proposed take away the number of bins required has been set at 4

The bins will be stored in a shed approx 9.0m away from the rear entrance of the take away across an open yard as shown on plan

The bins are collected from the rear alley outside the rear gate of the shed in common with the other businesses along this section of Stockport Road

Oppertunities for any recycling will be carried out within the shed and the relevant bins left out in the alley o scheduled collection days

April 2008
