Dear Tony

INSTALLATION OF NEW FUME EXTRACTION SYSTEM, CHEMISTRY BUILDING, UNIVERSITY OF MANCHESTER

Further to our meeting of 6th January, I am pleased to enclose of 2 no. planning applications for the above development. The applications are submitted via the Planning Portal.

As discussed at our meeting, two applications are submitted to provide a new extraction system for the existing Chemistry Building. One application relates to the replacement of the existing central system, including the installation of plant on the 9th floor roof. The second application relates to the replacement of the existing extraction system serving the fourth floor, including the installation of plant on the 7th floor roof.

The applications are submitted independently but a combined Planning Statement and Noise Assessment report has been prepared. The applications consist of the following:

- Completed application forms and certificates (one set for each application);
- Site Location and architectural plans (one set for each application);
- Noise Assessment (combined and covering both applications);
- Planning and Design Statement (combined and covering both applications);
- Air Quality Statement (contained within the submitted Planning Statement).

Two cheques each to the value of £1,005 have been issued in the post as the requisite planning application fees.

I trust that you are in receipt of all the information you require to determine the current applications. However, please do not hesitate to contact me if you require anything further.

Registered in England Turley Associates Limited no. 2235387. Registered office: 1 New York Street, Manchester, M1 4HD

Yours sincerely

Andrew Bickerdike
