Waste Management Strategy

Number of bins proposed

4x Euro Bins (large metal, top loading on 4 wheels) for General Waste
2x Euro Bins for Glass to be recycled
2x 1m2 Metal Cages (wheeled) for Cardboard for recycling
We have arranged for this number as this is sufficient for our use at Sankeys over a full capacity weekend (ie 2x 1000) which is equivalent to a capacity crowd for one night at The Beach.

Bin Storage area

Bin store area is marked **10** on the general layout. This is immediately adjacent to the the side of the bar and the also to the cellar entrance, so that all glassware from behind the bar, and all cardboard from unpacking cases into the fridges goes directly into the bins.

Bin collection arrangements

This will happen daily, and the Bin Store is next to Byrom St so that collection trucksa do not need to come onto the site at all.

Planning Application 086809 – Beach, Spinningfields
Additional Notes

Waste Management – Bin Collection

This will be done in the mornings between 7.30 and 8.30am, and in the evenings between 6.30and 7.30pm in order not to disturb those working in adjacent offices and performances at the Opera House.

Deliveries

Main deliveries will be from the brewery (Carlsberg UK), these will be twice weekly to start, maybe rising to 3. We will request that they arrive before 9am. Other deliveries where possible will be asked for outside normal office hours.

Nightly Close-down

We will ensure that all customers are off the site by 11.30pm, and then the site and surrounding streets will be swept clean (and the sand raked). The site will then be secured ie closing the entrances and replacing crowd control barriers with Heras fencing, and handed over to our night security. We would envisage all staff off-site by 12.15-12.30am. There should be no noise implications as there is no glassware given to customers.

Post-Event Making-good

This will be completed by the end of Friday 19th Sept. It will involve taking the sand away and dismantling the decking for removal and recycling. All structures will be taken down and removed. Re-turfing will be done where necessary.
