Date of Decision 18 September 2008

for the carrying out of development referred to in Part 1 hereof in accordance with the application and plans submitted subject to the following conditions:

Part III – Conditions and Reasons

1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason - Required to be imposed pursuant to Section 91 of the Town and Country Planning Act 1990.

2) No development shall commence until a scheme for the storage (including segregated waste recycling) and disposal of refuse shall be submitted to and approved in writing by the City Council as local planning authority. The details of the approved scheme shall be implemented as part of the development and shall remain in situ whilst the use or development is in operation.

Reason - In the interests of amenity and public health, pursuant to Manchester Unitary Development Plan policy E1.2.

3)) No development that is hereby approved shall commence unless and until samples and specifications of all materials to be used on all external elevations of the development have been submitted to and approved in writing by the City Council as local planning authority. The development shall be constructed only using the approved materials unless otherwise agreed in writing by the City Council as local planning authority.

Reason - To ensure that the appearance of the development is acceptable to the City Council as local planning authority in the interests of the visual amenity of the area within which the site is located, as specified in policy I3.1 and Objective E3 of the Unitary Development Plan for the City of Manchester.

4) The consent hereby granted is for a development that has full access to all areas of the buildings and throughout the site for persons whose mobility is impaired.

Reason - For the avoidance of doubt and so as to provide direct access for disabled persons, pursuant to Manchester Unitary Development Plan policies DC9.1 and DC14.2.

5) The development hereby approved shall be carried out in accordance with the following drawings and information:

L(90)100; L(--)114; L(--)115; L(--)116; L(--)117; L(--)110; L(--)111; L(--)112; L(--)113; L(--)107; L(--)108; L(--)109; and in accordance with the details and conclusions set out in the acoustic report from Acoustic _ Engineering Consultants Limited, Reference P1464/R1/PES dated 23 December 2005.

Reason - For the avoidance of doubt and to ensure that the development is implemented in accordance with the approved plans and information.

6) The applicant shall, with regard to television reception in the area containing the application site, provide the City Council as local planning authority with studies that:

a) Measure the existing television signal reception within the potential impact area, as identified in the letter from Astbury Digital dated 18 December 2007, and within an area of 500 metres radius surrounding the building, before development commences. The work shall be undertaken either by an aerial installer registered with the Confederation of Aerial Industries or by a body

approved by the Office of Communications (Ofcom), and shall include an assessment of the survey results obtained.

b) Assess the impact of the development on television signal reception within the potential impact area identified in (a) above within one month of the practical completion of the development or before the development is first occupied, whichever is the sooner, and at any other time during the construction of the development if requested in writing by the City Council as local planning authority in response to identified television signal reception problems within the potential impact area. The study shall identify such measures necessary to maintain at least the pre-existing level and quality of signal reception identified in the survey carried out in (a) above. The measures identified must be carried out either before the building is first occupied or within one month of the study being submitted to the City Council as local planning authority, whichever is the earlier.

Reason - To provide an indication of the area of television signal reception likely to be affected by the development to provide a basis on which to assess the extent to which the development during construction and once built, will affect television reception and to ensure that the development at least maintains the existing level and quality of television signal reception, as advised in Planning Policy Guidance Note 8: Telecommunications.
