Fig. 1. Photo taken from the first floor interior of the building looking at the back of the lower level frame fixing (left banner as looking from Albert Square)

Fig 2. Photo taken from the first floor interior of the building looking at the back of the lower level frame fixing (right banner as looking from Albert Square)

Fig. 3. Photo taken from the first floor interior of the building looking at the back of the frame fixing top for the existing banner on Southmill Street.

Fig. 4. Close up photo of the lower level frame fixing, both arms from each banner are fixed by 2 No. bolts into the stone cill.

Fig 5. Exterior view of the top fixing. Inspection from ground floor level shows that a plate is fixed directly back to the building facade and a hook also supports the top of the frame (hung from the window projection above). Each banner frame is fixed in the same way

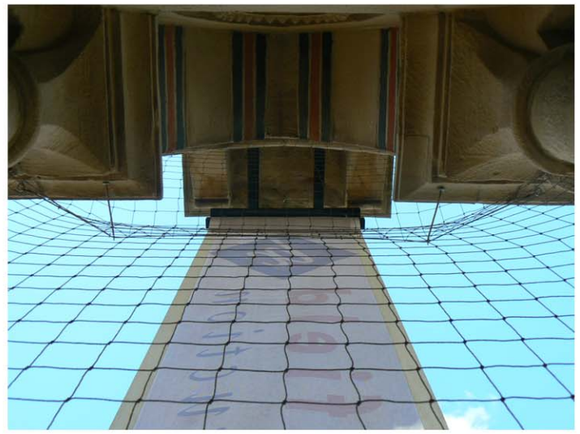

Fig 6. Photo taken at first floor level looking up towards the fixing at the top of the banner (which is obscured by the window reveal)

Fig 7. Close up of Fig. 6.

Fig 8. External view below the existing banner

Fig. 9. External View of bottom of the banner frame. The main fixing is to the window cill at first floor level with an anchor point in the mortar between the stone below.
