2.0 Scope of Works

The proposed work is to provide a new temporary storage unit for sports equipment.

Position/location

The building is to provide a temporary storage solution for sports equipment. As such the storage unit has been sited next to the playground and sports field for ease of access.

Material

Due to the possible threat of vandalism and robbery the chosen material for the storage unit is metal.

Colour

Dark green is the chosen colour for the storage unit. It is felt this will offer the greatest reduction in terms of visual impact. This is because the land adjacent to the storage facility is green e.g. trees and grassed area.

To be read in conjunction with drawing ED35576 – B010B – proposed New External Storage Unit, Location and Site Plans and storage unit product literature from Elwell Buildings – Supersafe.

3.0 Impact of Proposed Work

The proposed storage unit has been designed taking into consideration the immediate environment. Such as the colour is dark green to reflect the natural local environment and the unit is positioned on the site in a discrete position to one end of the site.
