CERT FIRE

TASKMASTER™ S Series

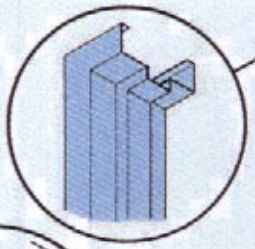

The right choice in steel doorsets for all applications

Personnel Doors · Fire Resisting Doors · Escape Doors · Entrance Doors · Security Doors

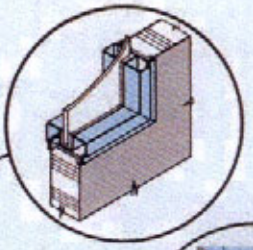

Product is right

Modular standard sizes

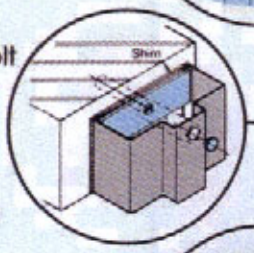

Flush welded corners for strength and rigidity.

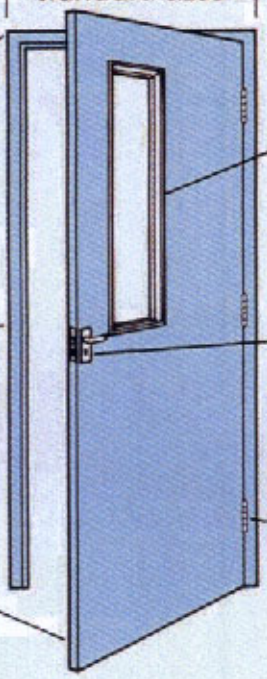

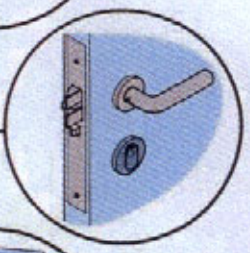

A wide selection of neat and attractive glazing trims.

Welded frame straps for sleeve anchor bolt fixing to masonry or screw fixing to steel work, or stud partitions

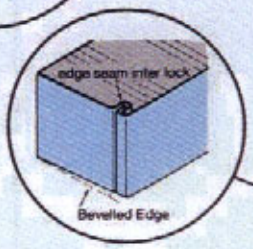

Factory fitted hardware.

Galvatite ZF face sheets bonded to a structural honeycomb core and joined by a strong, bevelled, edge seam interlock.

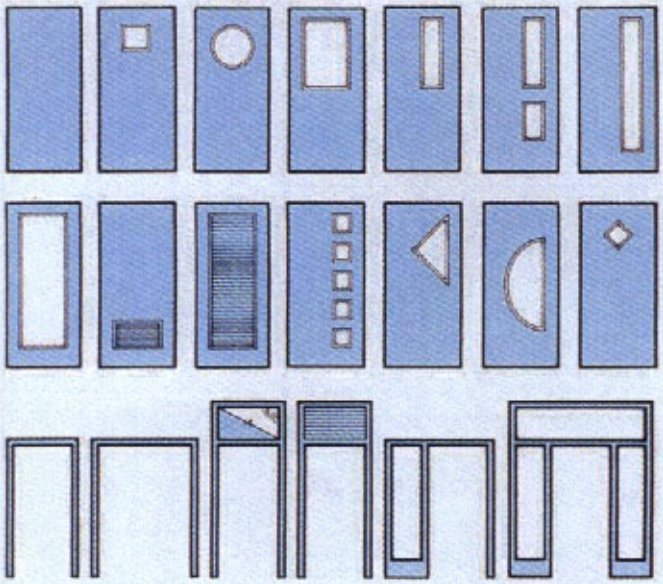

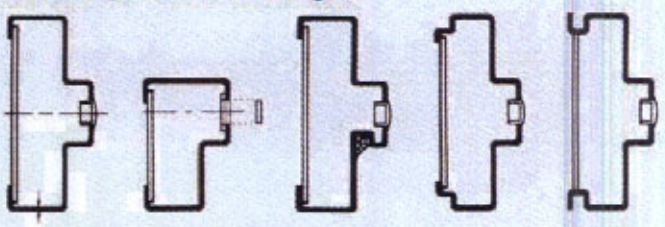

Pre-hung on steel template butt hinges, with hardware fitted for ease of handling and speedy installation.

Options are right

A wide range of standard and custom design features are available.

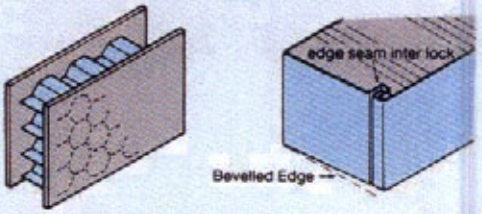

Frame profiles are right

Standard and custom frame profiles to cover all applications.

Door construction is right

1.2mm steel face sheets, laminated to a structural honeycomb core giving excellent impact resistance and true flat surfaces. Bevelled door edges permit minimal clearance between door and frame.

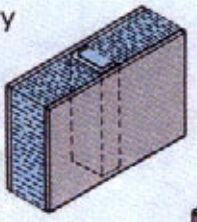

Performance is right

Extensive field of application for fire resisting doorsets to BS 476 Part 22 approved under CERTIFIRE product certification.

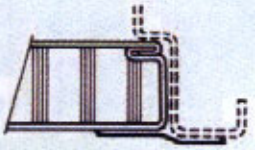

CERT FIRE

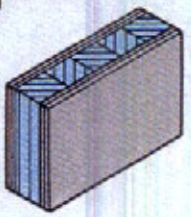

Many optional security features available.

Laminated mineral wool core with steel stiffeners for lower 'U' value

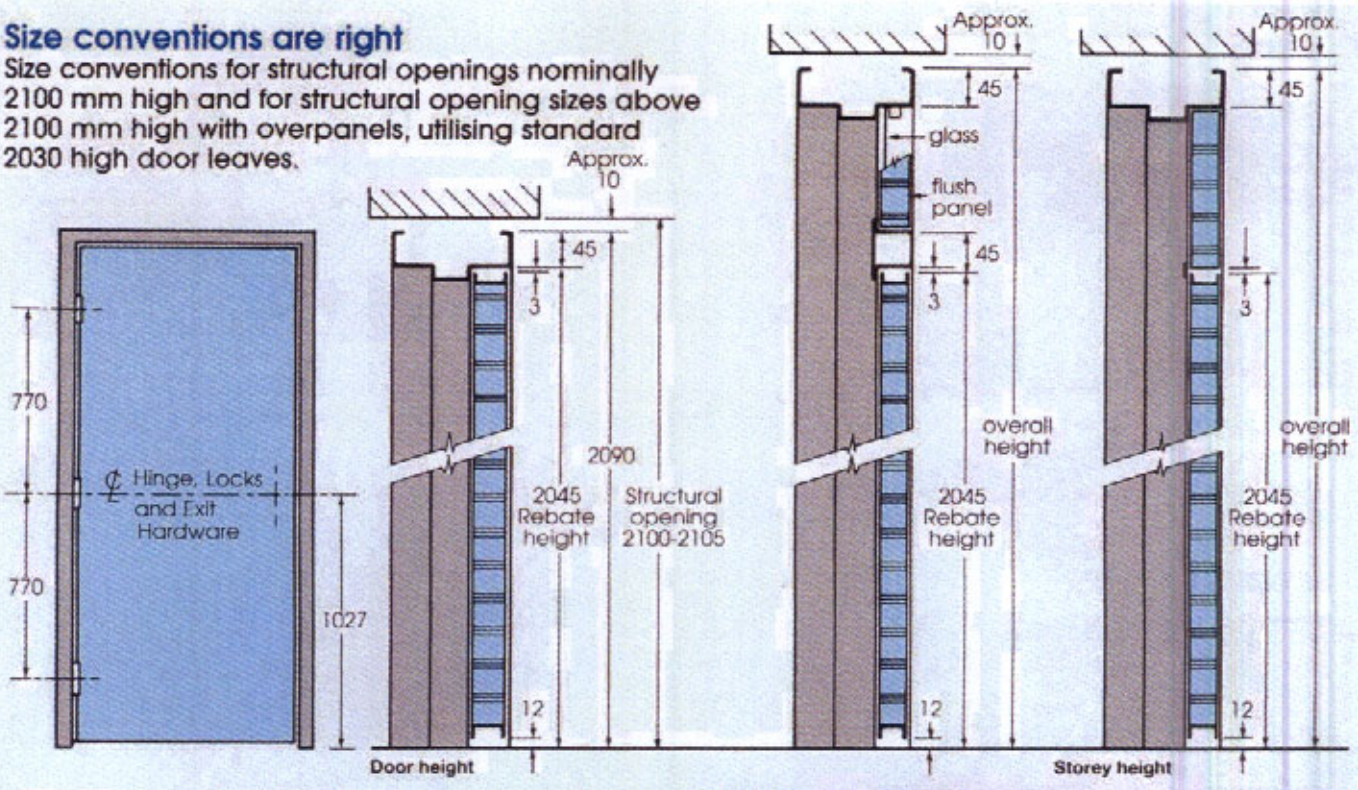

Edge cover strip for security doors

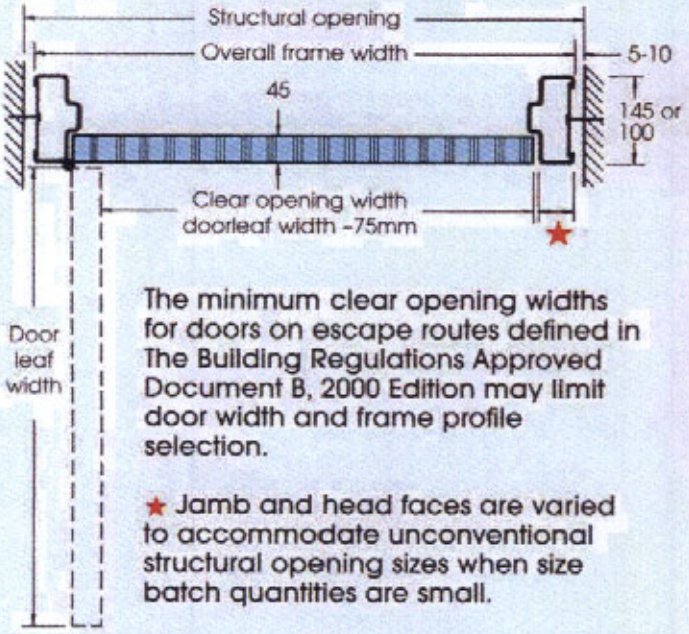

Laminated hardwood core for high security doors

Size conventions are right

Size conventions for structural openings nominally 2100 mm high and for structural opening sizes above 2100 mm high with overpanels, utilising standard 2030 high door leaves.

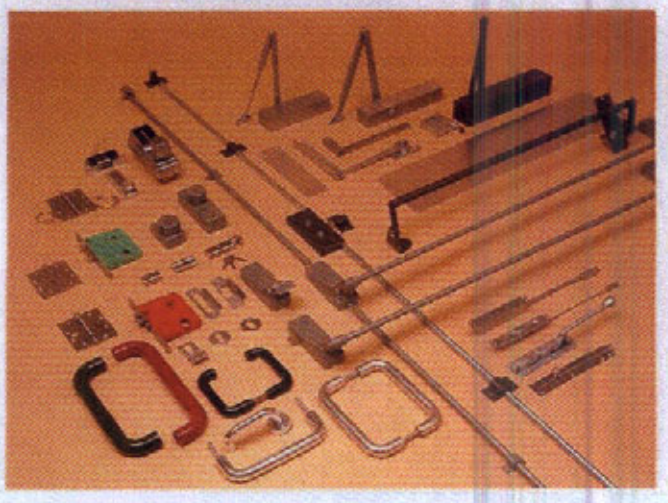

The minimum clear opening widths for doors on escape routes defined in The Building Regulations Approved Document B, 2000 Edition may limit door width and frame profile selection.

★ Jamb and head faces are varied to accommodate unconventional structural opening sizes when size batch quantities are small.

Hardware is right

An extensive range of standard co-ordinated architectural quality hardware is available suitable for all applications.

Doorset sizes for 2100 mm high openings:

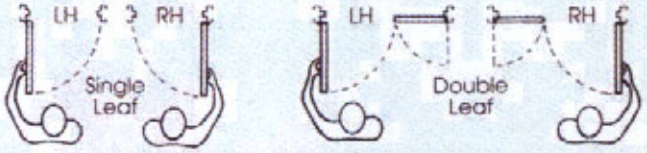

The following standard door leaf size options are normally utilised in single and double leaf doorsets Height: **2030** Widths: **725, 825, 860, 925, 1025, 1125**

Special doorset sizes

Special doorset sizes are manufactured to order, with door leaf sizes up to a maximum of 1350 wide x 2500 high. Door leaf heights over 2500 high to 3000 high are limited to a maximum width of 1150 mm.

Handing

Doorsets are handed from the pull to open side whether open-in or open-out.

Finish is right

Baked-on grey etch primer for site painting, or factory applied polyester powder coating and stove enamelled finishes in standard or special colours from the RAL and BS colour ranges.

TASKMASTER™ S Series the right choice in steel doorsets

Customer service is right

Our experienced staff are but a call away for technical advice and assistance.

Prices are right

Fully detailed, competitively priced quotations offering excellent quality and product value for money.

Order processing is right

Drawings and schedules, co-ordinating door and hardware requirements for each opening are issued for approval prior to manufacture, whether orders are large or small. Our team of contracts engineers are well experienced in handling orders of 1000 doorsets or more.

Manufacture is right

Utilising the latest CAD/CAM production technology, Taskmaster 'S' Series steel doorsets are manufactured by the thousand annually to BS EN 9000 quality systems at our one acre, modern manufacturing facility at Minworth, Sutton Coldfield, near to Birmingham. Doorsets are factory assembled and hardware is trial fitted before despatch to ensure accuracy and correct functioning when installed on site.

Availability is right

Premium fast track service for urgent orders. Standard sizes in around 3-4 weeks, Specials from around 6 weeks.

Installation service is right

When sub-contract installation is required Taskmaster doorsets are fitted by teams of trained site engineers co-ordinated from pre-contract meetings to accepted handover by experienced contracts managers. Alternatively Taskmaster doorsets may be specified to be supplied and installed by industrial door, cladding and fit-out sub-contractors are part of trade packages.
