LIGHTING ASSESSMENT
for
PROPOSED EXTERNAL SIGNAGE
for
SANTANDER

Site Location – 3 Hardman Boulevard, Spinningfields, Manchester, M3 3AQ

The internally illuminated fascia sign is lit using low energy LED's to illuminate the flex face material, giving even illumination across the complete fascia, with any ambient light lost within the building and the immediate vicinity.

The signs will be on a time clock and photo cell, with the hours of illumination being from dusk to 11pm.

The existing internally illuminated ATM (Cash Machine) Header panels are lit using 2-off TL5 fluorescent lamps and electronic control gear to illuminate the face panel, any ambient light will be lost in the immediate vicinity. The header panel is continuously illuminated for the safety and security of persons using the cash machine.
